OFFICE OF THE CITY SECRETARY

DECLARATION OF DISASTER

- Whereas,** the City of San Juan on the 20th day of June, 2018, has suffered widespread or severe damage, injury, or loss of life or property (or there is imminent threat of the same) resulting from the Heavy tropical rainfall causing sever massive flooding to the City of San Juan that started on June 20, 2018.
- Whereas,** I, Mayor Mario Garza of San Juan Texas has determined that extraordinary measures must be taken to alleviate the suffering of people and to protect or rehabilitate property,

NOW, THEREFORE, BE IT PROCLAIMED BY THE MAYOR OF SAN JUAN:

That a local state of disaster is hereby declared for San Juan, Texas pursuant to §418.018(a) of the Texas Government Code.

Pursuant to §418.018(b) of the Texas Government Code, the state of disaster shall continue for a period of not more than seven days from the date of this declaration unless continued or renewed by the City of San Juan, Texas Commission of San Juan, Texas.

Pursuant to §418.018(c) of the Texas Government Code, this declaration of a local state of disaster shall be given prompt and general publicity and shall be filed promptly with the City Secretary.

Pursuant to §418.018(d) of the Texas Government Code, this declaration of a local state of disaster activates the City emergency management plan.

That this proclamation shall take effect immediately from and after its issuance.

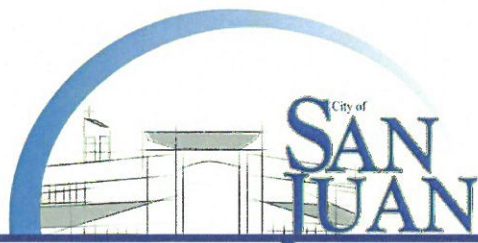

ORDERED this the 20th day of June, 2018.

AGENDA ITEM AND RECOMMENDATION SUMMARY
CITY COMMISSION REGULAR MEETING
JUNE 26, 2018

Discussion and Possible Action on Naming the Sports Complex Currently Referred to as Mayfield Park.

STAFF COMMENTS AND RECOMMENDATIONS:

In June of 2017, Parks Board President Mark Alaniz presented to the commission the idea of naming the the Sports Complex currently referred to as Mayfield Park. This proposal included soliciting input from the community to help name the complex. On February 29, 2018 the San Juan Parks Board presented to the commission the online survey that was to take place throughout the month of March 2018. This survey has been completed each submission has been included in this packet for your review.

RECOMMENDATION:

PREPARED BY:

Patrick Willingham,
Director of Parks and
Recreation

APPROVED BY:

Benjamin Arjona, City
Manager

To: City of San Juan Commission
From: San Juan Parks and Recreation Advisory Board

RE: Online Submissions to Name Baseball & Softball Complex on San Antonio & Ridge Road

May 14, 2018

MEMORANDUM

Throughout the month of March the public was given the opportunity to participate in providing suggestions for the naming of the entire Softball & Baseball complex that currently consists of 2 fields; Arcaute and Mayfield through an online portal created by the city and hosted on the city's home page. At this time, we submit to you a report regarding the results of the online submissions. This report includes; (A) The name suggested, (B) who it was suggested by and (3) The rationale given for the suggested name.

We look forward to presenting and discussing this report at the next City Commission Meeting.

Mario Alaniz (57)

Submitted by Richard Weaver Email: radserver@gmail.com

- Mr Alaniz was a model citizen. Proud PSJA Bear making all district as their star 3rd baseman in 1954. Was a board member of Leo Najo Baseball Hall of fame. Played Semipro baseball with various teams in the RGV and San Antonio. Also played professional baseball with Mexico. He was a veteran serving with the Honorable 82nd airborne. Was a member of the Federal Mounted Patrol. Also umpired and coached for San Juan.

Submitted by Brent Isaacs Email: jamesbrentisaacs@gmail.com

- Rationale: None

Submitted by Jeff Russell Email: jwrussell275@gmail.com

- Rationale: Honor a Korean War Veteran

Submitted by: Ed Beverly Email: ejb5493@sbcglobal.net

- Mario died in 2015. Except for an army tour as a paratrooper he lived his whole life in San Juan. A graduate of PSJA in San Juan in 1952. From that time on he was a volunteer coach at the school district. He and his wife Oralia were active in San Juan activities, especially the St. Vincent de Paul Soup Kitchen. Mario was inducted into the Leo Najo Baseball Hall of Fame.

Submitted by Julie Levin Email: Jules@instantname.com

- Served during Korean War, brought a lot to local society after he returned. An amazing human being who deserves to be remembered

Submitted by Tom Costello Email: brokertom2@gmail.com

- Mario Alaniz served in the Armed Forces during the Korean War (the legendary 82nd Airborne), He worked as a civil servant through his career in the USDA. He played semi-pro baseball, he was a baseball coach to many and he loved the game! The park should be named after him as a place to instill not just lessons about the game, but life lessons as well. His was a life well lived and is a worthy candidate to name for this exceptional park

Submitted by Brian Rabichow Email: capeezee@yahoo.com

- Mario Alaniz was a war vet who served his country during the Korean War. He also worked as a civil servant in the USDA. He played semi-pro baseball and even coached many other children in baseball. It is clear from the life he lived that his name is meant to be memorialized in the naming of this park.

Submitted by Olivier Bricaud Email: obricaud@gmail.com

- Mario Alaniz served in the Armed Forces during the Korean War era (the legendary 82nd Airborne), worked as a civil servant through his career in the USDA, played semi-pro baseball, coached his two sons, and his grandson, among many other boys, now grown men, in this very complex of baseball/softball diamonds; instilling not just lessons about the game, but life lessons as well.

Submitted by Miriam Schimmel Email: mlsoct20@gmail.com

- Mario Alaniz raised his family in the city of San Juan, so naming the park after him would be a great way to honor a man from the community, as well as honor the United States Armed Forces (where he served during the Korean War era in the legendary 82nd Airborne). Mr. Alaniz also worked as a civil servant through his career in the USDA, played semi-pro baseball, and again, keeping it within the community, he also coached sons, nephew, and many other boys over the years at the same complex of baseball/softball diamonds. It seems like he would be a perfect choice!!!

Submitted by Michelle Sadegh Email: michsadigh@gmail.com

- To honor Mario Alaniz's service in the Korean War and his years of public service at the USDA.

Submitted by Katrina Richards Email: kaeri0305@yahoo.com

- This man was dear to many and is from this town. He was in war, and played semi pro baseball. He coached many, and help guide young boys from all walks of life.

Submitted by: Marga Munson Email: margamunson@gmail.com

- Mario Alaniz served in the Armed Forces during the Korean War era (the legendary 82nd Airborne), worked as a civil servant through his career in the USDA, played semi-pro baseball, coached his sons, among many other boys, now grown men, in this very complex of baseball/softball diamonds we are looking to name after him; instilling not just lessons about the game, but life lessons as well.

Submitted by: Nadia Moreno De Garza Email: mnadjai@aol.com

- Mr. Alaniz was a resident of San Juan for many years. He was an active member of his community and served in different ways. Mr. Alaniz graduated from PSJA High School (where he played baseball), he also served his country as an Army Paratrooper. Mr. Alaniz loved baseball and volunteered in the city of San Juan as a baseball coach and umpire. He was also inducted to the Leo Najo Baseball Hall of Fame. Mario Alaniz volunteered at the Saint Vincent De Paul soup kitchen in this city. He was a caring, compassionate, hard working man who loved his city and his community. This is the reason why he is a great candidate to have this complex named after him.

Submitted by: Karen Boman Email: kbroylesboman@yahoo.com

- Mario Alaniz served in the Armed Forces during the Korean War era (the legendary 82nd Airborne), worked as a civil servant through his career in the USDA, played semi-pro baseball, and also coached his sons, nephew and other young men in the community in baseball.

Submitted by: Charmaine Puzon Email: charmainepuzon@aol.com

- Mr. Mario Alaniz was a much respected and loved citizen of San Juan. He was a veteran who served in the Armed Forces 82nd Airborne during the Korean War. He also worked as a civil servant with the USDA, played semi-pro baseball, and coached his own two sons and

their friends on this very field when they were little, and later taught his grandson to play ball on this field as well. Mr. Alaniz passed away in 2015, and it would mean so much to his family and friends if this field was named in his honor.

Submitted by: Kyle Hugely Email: kyleaaris@gmail.com

- Mario Alaniz served in the Armed Forces during the Korean War era (the legendary 82nd Airborne), worked as a civil servant through his career in the USDA, played semi-pro baseball, coached my brother and I, and my young nephew, among many other boys, now grown men, in this very complex of baseball/softball diamonds we are looking to name after him; instilling not just lessons about the game, but life lessons as well.

Submitted by Veronica Moy Email: imyourlil88@gmail.com

Submitted by: Emily Rehm Email: emilyannrehm@yahoo.com

- Korean War veteran and semi-pro baseball player Mario Alaniz coached his sons and nephew among these baseball diamonds. He was a devoted civil servant and father. He and his memory would be a role model to future generations of youth who come to the park to play baseball and enjoy life.

Submitted by: Laura Benscoter Email: 321lgb@gmail.com

- Mario Alaniz left a great impact and legacy behind. He served his family, country, and community with everything he had, sacrificing his time, energy, and self for the better of this world. Aside from playing baseball at the semi-pro level, He coached baseball for many years, teaching life long lessons to teams of boys who are now men impacting their own communities. This park would be an honor to not only Mario, but all those that he taught and coached who now carry on his legacy.

Submitted by: Jocelyn Selter Email: jstudent20@hotmail.com

- Because of all his accomplishments and his great impact among his family and the community!! Mr. Alaniz deserves to be honored in such special way.

Submitted by: Evita Chapa Email: evitachapa@hotmail.com

- He served in the Armed Force's legendary 82nd Airborne during the Korean War, played semi-pro baseball, passed on his wisdom to his family and many other boys at this same complex. It would be more than fitting to have it named after this hard working family man.

Submitted by: Jacqui Mendoza Email: JacquelineAMendoza@gmail.com

- No reason Given

Submitted by: Eric Vassy Email: e_fence@yahoo.com

- Mario Alaniz served in the Armed Forces during the Korean War era (the legendary 82nd Airborne), worked as a civil servant through his career in the USDA, played semi-pro base-

ball, coached his sons and cousins among many other boys, now grown men, in this very complex of baseball/softball diamonds. He instilled not just lessons about the game, but life lessons as well. I think honoring this man would be a wonderful tribute.

Submitted by: Ken Shurin Email: kshurins@yahoo.com

- A part of the community helping young boys learn the sport of baseball. A member of our armed forces and a local civil servant.

Submitted by: Sandra Alaniz

- To honor a baseball MVP from San Juan

Submitted by: Alicia Jimenez Email: alajmznz@aol.com

- Mario Alaniz was inducted into the Leo Najo Baseball Hall of Fame. He also volunteered as a coach and umpire in San Juan. He served in the Army as a paratrooper. Mario belonged to St. Vincent de Paul and was a volunteer driver for the Food Bank. Mario was a good, kind, and honest man who loved his family, loved to serve and volunteer in our community. He truly deserves to have the park named for him. Thank you.

Submitted by: Cindy Esquivel Email: cindy_e2010@yahoo.com

- Mr. Alaniz was a great man and left behind a beautiful legacy for the city of San Juan. I have known Mr. Alaniz since I was a little girl and he was always very kind to me, and as I aged I saw how wonderful he was not only to me but all children. He was a very selfless and good-natured man and his family is very dear to me. As one of the pioneers of this city and a great idol to all residents that knew him, I have no doubt his name is the indicated one for this park.

Submitted by: Laura Garcia Email: Garcia.laura3@aol.com

- Coached for San Juan. Played professional baseball. He is deceased but he was a good man.

Submitted by: Mario Alaniz mario_alaniz@yahoo.com

He was a good builder of young men, and served as coach in the area for a number of years.

Submitted by: Edward Beverly Email: ejb5439@sbdglobal.net

- Mario died in September 2015. He was a long time resident of San Juan he graduated from PSJA in 1954. He played baseball all through his school years. Joined the Army and return home. Married and reared three children. He was always umpiring and coaching the baseball teams for many years. He was inducted into the Leo Major Baseball Hall of Fame. He and his wife Oralia were active in the community.

Submitted by: Oralia Alaniz Email: ofalaniz@hotmail.com

- Mario was born and raised in San Juan, a veteran with the Army as a Paratrooper in 1955. Inducted into the Leo Najo Baseball Hall of Fame in 2007. And volunteered as a coach and umpire for youth baseball if San Juan for many years.

Submitted by: Bernardo Carpio carpiob@Hotmail.com

- Mr Alaniz, loved Baseball and the city of San Juan. He was one of first to play Professional baseball in the area, coached the youth league for years, always promoted youth sports in city hall. He not only cared about San Juan and the youth program ;he was a Vetern Serving in the US Army Airborne during the World War. He awoke each morning rasing his U.S. flag outside his residence and his door was open to all. He never lost his passion for Baseball and always attended opening day at the San Juan parks. For those reasons I nominate him for the parks name.

Submitted by: Vangie Alaniz Email: vangie_alaniz@yahoo.com

- Mario Alaniz was very active in the San Juan community for decades. He was inducted into the Leo Najo Baseball Hall of Fame. He was a great baseball player in his youth and an even greater coach in his golden years.

Submitted by: Rebeca Reyes

- Mario Alaniz was my compadre, he passed almost four years ago in his home in San Juan. He was always a helping hand when there was someone in need. He was very involved in the community, volunteering in the St. Vincent De Paul Soup Kitchen located at St. John the Baptist Catholic Parish. He was a simple, humble man. It would be an honor to have this baseball park named after Mario Alaniz.

Submitted by: Karen Esquivel

- Mario Alaniz lived in San Juan, TX all his life. He was a star baseball athlete, he played in semi-pro baseball in South Texas, later being inducted into the Leo Najo Hall of Fame. He served in the United States US military, after his time in the military he worked in the department of agriculture in Hidalgo County. Along with his wife, Oralia Alaniz, he opened San Mar Department Store and Mark's 5 & 10 located in downtown San Juan, helping the original downtown grow into a strong community through the 1980's. He was a huge baseball fan and having this park named after him would do it justice.

Submitted by: Kathleen Frye Email: kec34@aol.com

- Mario Alaniz was inducted into the Leo Najo Baseball Hall of Fame. He was also a coach in San Juan. Long time resident, native born, and past business owner in San Juan.

Beto Aguirre (10)

Submitted by Maricela Fonseca Email: maricela.fonseca@yahoo.com

- I remember meeting the man that made a big impact in my husband life within his younger age in sports.

Submitted by Jon Thompson Email: jonthompson167@gmail.com

- Sr. Aguirre was a life long resident of San Juan and a true Baseball fan. He raised two sons (Beto & Jaime) that were both good baseball players for the PSJA Bears. Thank you for considering his name.

Submitted by Martin Fonseca Email: m_fonseca003@yahoo.com

- i myself was greatly helped during the 70's in playing baseball. coming from a low income family, he assisted me with an avenue in finding my way through sports. and baseball, which the park was just down the road, became a game to play and compete with other youths at the time. it built a sense of teamwork which went into high school. he was a big part of baseball during that time.

Submitted by: Chris Thompson Email: psja1985@gmail.com

- Mr. Beto Aguirre Sr. was a PSJA graduate and played baseball. He started the American Legion baseball team in Pharr. He played semi pro baseball. He coached little league baseball in San Juan. He was a good man and very funny. Well liked and respected in the City of San Juan. He was good to all athletes at PSJA and supported boys and girls teams for many years. We would go to his house and eat like kings. His wife would make the best enchiladas. HE IS YOUR MAN!

Submitted by: Irene Thompson Email: thompson.irene@gmail.com

- Mr. Aguirre's passion was baseball and all who knew him know of how much he valued what the sport did for him, his sons, and indeed all the youth. I can think of no one more deserving.

Submitted by: Beto Aguirre jr Email: betoaguirre628@gmail.com

- Beto grew up in San Juan and was a player and coach in San Juan. He also started the American Legion Baseball Program in the early 1980's so that the kids from San Juan could continue to play Baseball during their High School years. He served as the director of American Legion Baseball for many years. He lived a few blocks away and supported the program for years after his sons finished their laying days at the park

Submitted by: Jaime Aguirre Email: astrojag@gmail.com

- Beto Aguirre was involved with youth baseball for many years in The City San Juan as a coach for little league, bronco and pony league. Numerous players that were coached and mentored by Mr. Aguirre went on to play baseball in high school at PSJA and beyond. Mr. Aguirre also began American Legion Baseball at Pharr Post 101 as athletic director in the 1980's so that kids from San Juan and the surrounding cities could continue to improve their baseball skills and prepare them for high school and college baseball.. Mr. Aguirre was a proud and respected lifelong resident of The City Of San Juan.

Submitted by: Jacqueline Inks Email: inks93@gmail.com

- He was an awesome athlete and graduated from PSJA High School

Submitted by: Jeff CONTRERAS Email: rjcontreras89@yahoo.com

- Very involved with all kids that played for city league, and supporter of PSJA BESRS baseball for many yrs.

Submitted by Rene Jaime rjaime@cityofsanjuantexas.com

- Please know I had the pleasure of knowing Mr. Aguirre since I was a boy and on through my adult life. Mr. Aguirre was an individual who loved his community and was proud to be from the City of San Juan. As well, Mr. Aguirre was a loving and kind individual who cared about our youth. As you can see from his obituary below he lived in the City of San Juan all his life,

was a family man, graduated from PSJA, served in the U.S. Army, and was a federal and PSJA employee and was heavily involved in baseball at all levels. As well, he lived just a few blocks from what is currently know as Mayfield Park on Texas Avenue. In addition as an athlete himself of a high caliber which included him playing semi-pro baseball, he was involved in baseball as a coach and as the organizer of "the Post 101 Pharr American Legion Baseball Team" and later served as the District 15 American Legion Baseball Chairman which covered from Zapata to Brownsville. The American Legion Baseball program helped develop players at the high school level. Furthermore, Mr. Beto Aguirre, Sr. supported and encouraged many of our athletes at PSJA over the years and I'm proud to say I was one. I can't express with justice what an impact Mr. Aguirre had on me while I played football in high school. Fortunately for me, I have this opportunity to share a little about Mr. Aguirre and the man I knew him to be. When Mr. Aguirre would see me, he would stop everything to ask how I was doing, "joke with me" and encourage me as an athlete. As well, he would often call me late at night after my games to let me know he was proud of how I played and proud of me. He would also discuss with me certain plays I had made so I would know he had been watching me. He would even talk about tactics I had used during the game that not even the referees had caught. He made me feel like an important part of my team. And now over 30 years later, having this opportunity to remember and share what he did for me really means a great deal. In many ways, I feel Mr. Aguirre's support of our youth and his contribution to athletic programs and his love of his community is the epitome of what we need for our youth programs today. Regardless, I am grateful to have this opportunity to share a little about Beto Aguirre, Sr.

Mr. Aguirre's obituary below was published in The Monitor on June 10, 2013.

"ADALBERTO A. "BETO" AGUIRRE, SR. SAN JUAN - Adalberto A. "Beto" Aguirre, Sr., 86, of San Juan went to be with the Lord on Saturday, June 8, 2013. He was born in San Juan, Texas on February 6, 1927 and lived there his entire life. He is preceded in death by his parents, Cirilo and Rita Aguirre; two brothers, Cirilo Aguirre, Jr. and Ramon Aguirre. Beto graduated from PSJA High School in 1945 and served in the US Army from 1945 to 1947. He attended Pan American University. He spent nearly 40 years of his professional career in government service, most of which was with the US Treasury Department - Customs Division. After retirement from government service, he was head of security for the PSJA School District until 1999. For anyone who knew Beto, they knew that sports were his passion. While in high school and college, he participated in numerous sporting events, including football, track and field, and boxing. Baseball, however, was his ultimate passion. He played semi-pro baseball here in the Valley and Mexico as a second baseman until the age of 45. He not only played, but managed and coached for several semi-pro teams. In 1978, he organized a Post 101 Pharr American Legion Baseball Team. Beto was later appointed District 15 American Legion Baseball Chairman which covered from Zapata to Brownsville. In addition to American Legion baseball, Beto also spent many years coaching youth baseball and thereby positively impacting the lives of many young people in this area. Beto is survived by his wife of 52 years, Noelia C. Aguirre of San Juan; two sons, Beto (Jennifer) Aguirre, Jr. of Pharr and Jaime Aguirre of McAllen; two grandchildren, Russell and Jami Aguirre; five sisters, Araceli Aguirre of Kansas City, Missouri, Rosario Cortez of Pharr, Angelica Richards of Virginia Beach, Virginia, Lucila (Sam) Lopez of Kingsville and Melva (Ramiro) Pedraza of Chicago Heights, Illinois; numerous nieces and nephews..."

- No reason given.

Cristela Alonzo Park

Submitted by: Abraham Diaz Email: abraham.diaz9@gmail.com

- Cristela Alonzo is a famous American comedian, activist, writer and producer from San Juan, Texas. Through her story, she empowers young women to continue working hard and overcome their struggles. As Ms. Alonzo shares her story, she mentions that she lived in poverty in San Juan but always loved the City of San Juan so much and through the many people in her path, she was able to beat the hard obstacles. I believe that the hard work, the love for the community, and the great respect that she has earned in Hollywood, would fit just right in our community as a way to show leadership for youth in San Juan. I ask that you consider Cristela Alonzo to rename the park as a way to motivate our young girl children in our city.

Gloria Evangelina Anzaldúa Park

Submitted by: Abraham Diaz Email: abraham.diaz9@gmail.com

- Gloria E. Anzaldua is a well known American scholar of Chicana cultural theory, writer, poet, and activist from Harlingen, Texas. Her work has pushed boundaries to empower youth women and children to continue fighting for a brighter future. She is well known for her work and legacy around institutions of higher education and her book Borderlands / La Frontera. With many research papers left behind, researchers doing theory on her work, and archives in various universities, Gloria Anzaldua has left a legacy for many Rio Grande Valley residents to continue.

Roberto Garza Baseball Park

Submitted by: Abraham Diaz Email: abraham.diaz9@gmail.com

- Roberto Garza is an honorable retired football player that is native to the Rio Grande Valley. Mr. Garza often comes to the Rio Grande Valley to teach children and youth about the importance of higher education and continuing to play sports as a way to release stress, exercise, and other things. I ask you to consider Roberto Garza as one of your options for the park. Thank you!

Dolores Huerta Baseball Complex

Submitted by: Daniel Lopez Email: lopez.290@osu.edu

- Dolores Huerta is a HUGE name in and out of the Valley. I have moved from the San Juan area: first to Columbus, Ohio and more currently, Portland, Oregon. No matter where I go, Dolores Huerta is a well-known and respected person (who is still living by the way; she was just last night on stage at the Oscars!) who has made a huge impact in the agricultural industry. She was at the forefront of the fight for basic human rights, dignity, wages, and the labor movement in general. The Valley has such a rich culture, and one that includes citrus farming, agriculture, and farm labor in general. I can think of no other person who would instill so much pride & respect for those who currently reside in the great city that is San Juan, Texas.

Alfredo “Fred” Estrada

Submitted by: Abram Estrada Email: abram_estrada@live.com

- He spent his afternoons coaching in those parks. He was a great father figure for many young children while also teaching how to play baseball. After his sons were too old to play in those fields he spent his afternoon being an umpire. He enjoyed the sport and coaching the youth.

RE: RFQ#18-68-05-31 Geo-Technical Engineering Services

To Whom It May Concern:

Raba Kistner, Inc. (Raba Kistner) is a firm that listens to its clients and is firmly committed to serving them with reliable, professional services. We have been providing professional engineering services to government-related clients for more than 50 years, including for the City of San Juan for over 20 years. These entities remain Raba Kistner's clients today because we listen, we understand their specific needs, and we help them accomplish their project objectives.

Raba Kistner is pleased to present our Statement of Qualifications to the City of San Juan for the above-mentioned RFQ for Geo-Technical Engineering Services. We have carefully reviewed the RFQ, evaluated the availability of key staff, and developed a strategy to effectively perform the necessary professional testing and engineering services. We feel that, given our history serving the City, we are familiar with your priorities and processes and can provide quality, timely, and cost effective services to the City of San Juan.

Raba Kistner is locally-managed and operated by professionals in two offices within the Rio Grande Valley, and is supported by one of the largest engineering firms in the southwestern United States. We have successfully worked on thousands of projects within the Rio Grande Valley. We offer one of the largest pools of resident technicians, inspectors, testing professionals, and engineers in the Valley. Our availability of staff and coverage in the area allows us to handle both large, complex, and smaller projects and have a high level of quality control on those projects. We provide other services, if required, such as environmental consulting and facilities engineering. These services can be done in a timely manner due to our staff availability and other resources available to our clients, such as our proprietary testing software Raba Kistner Information System (RKIS), which is discussed in detail within this Statement of Qualifications.

Our materials laboratories meet rigorous standards for testing and analysis procedures and advanced equipment calibration. The American Association of State Highway and

Section 1 Transmittal Letter

Transportation Officials (AASHTO) has issued accreditation to our McAllen laboratory facility in asphalt, concrete, aggregate, and soils since 2005. We are proud to have consistently maintained this distinction for thirteen consecutive years. Further, the United States Army Corps of Engineers (USACE) has validated our McAllen office facility. Raba Kistner's McAllen facility is the testing laboratory in the Rio Grande Valley holding the largest number of accredited tests under both of these distinctions. AASHTO is an organization comprised of transportation officials that administrate the quality of laboratory testing facilities at a national level. The objective of the AASHTO Accreditation Program is to provide a mechanism for formally recognizing the competency of a testing laboratory to perform specific tests on construction materials. This accreditation, combined with the USACE validation, provides a higher level of credibility in our deliverables and gives Raba Kistner's clients a higher confidence level pertaining to specific project results.

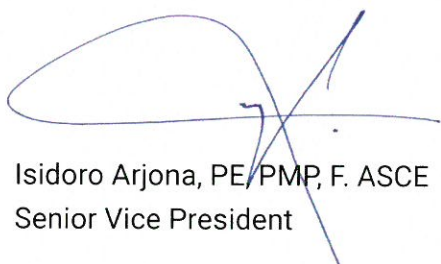

Point of Contact:

Mr. Isidoro Arjona, PE, PMP, F. ASCE
Senior Vice President
800 East Hackberry
McAllen, Texas 78501

Fax: 956-682-5487
Email: iarjona@rkci.com

Raba Kistner looks forward to continuing our strong relationship with the City of San Juan. We are honored for the renewed opportunity to be considered to provide geotechnical services for your upcoming projects. Upon reviewing our qualifications, should you have any questions or need further information, please contact me by phone at (956) 682-5332 or via e-mail at iarjona@rkci.com. I am able to bind the firm to a contract with the City of San Juan, should we be selected to provide services.

Very truly yours,

RABA KISTNER, INC.

Raba Kistner is recognized as one of the Southwest's largest consulting firms offering our engineering specialties. We provide professional Program and Project Management services and self-perform:

- Construction Materials Engineering, Testing, and Observation;
- Geotechnical Engineering;
- Building Envelope Testing and Consulting
- Environmental Permitting; and
- Cultural Resources

Our multi-disciplined team consists of civil, environmental, geotechnical, materials, and facilities engineers; LEED APs; environmental geologists; scientists; archaeologists; technicians; and support personnel.

More than 75% of our team holds licensure or certifications in their areas of expertise. Furthermore, Raba Kistner's Geotechnical and Construction Materials Engineering and Testing staff and laboratories are among the largest in the State.

— HISTORY

Raba Kistner, a privately held professional corporation, was founded by Bunny J. Raba, Carl F. Raba, and Ronald G. Tolson in San Antonio, Texas in 1968 as Raba & Tolson Consulting Engineers, Inc., practicing solely in Geotechnical Engineering. In 1973, Tolson left and the firm was renamed Raba and Associates Consulting Engineers, Inc. Richard W. Kistner joined the firm in 1974 and led the expansion into the practice of Construction Materials Engineering. The firm continued to grow and was renamed Raba-Kistner Consultants, Inc. in 1978 to reflect the addition of a new principal and the expansion of our services into major non-engineering areas, including Geosciences and Environmental Sciences. Raba Kistner began practicing Facilities Engineering in 1999. In 2012, the

Section 2 Firm Qualification and Experience

company reorganized to better serve its clients, now operating as a holding company, Raba Kistner, Inc., with four operating companies: Raba Kistner Consultants, Inc., Raba Kistner Environmental, Inc., Raba Kistner Infrastructure, Inc., and Raba Kistner Program Management, Inc.

Raba Kistner has played an integral role in the expansion of the Rio Grande Valley since 1991, and in improving the quality of life of its citizens. We have two primary local facilities—offices in McAllen and Brownsville.

The McAllen facility, the largest in the Valley, has more than 5,200 square feet

of air-conditioned space encompassing advanced technology in the geotechnical and materials testing laboratory. We are honored that public agencies and businesses in the Valley have recognized our engineering capabilities and have allowed us the opportunity to provide consultation on their projects. This local familiarity adds to the quality of services we are able to provide the City of San Juan.

Raba Kistner will perform all Construction Materials Testing and Geotechnical Engineering services for the City of San Juan projects through our McAllen office, with support staff available from our Brownsville office should it be required.

Experience with governmental agencies in the past five (5) years.

For over 26 years, Raba Kistner has played an integral role in the expansion of the Rio Grande Valley, as well as improving the quality of life of its citizens. We have performed Construction Materials Testing and Geotechnical services on hundreds of municipal-related projects within the Valley and have extensive experience assisting the City of San Juan, which will provide a unique advantage in servicing these Construction Materials Testing and Geotechnical Engineering projects.

PROCESSES TO MEET SCHEDULES AND DEADLINES

PROJECT SCHEDULING

Typically Raba Kistner's services are on an on-call basis and usually we are able to respond to requests within 24 hours and sometimes within hours. Depending on the laboratory testing performed, there is usually a certain period in which an acceptable time frame is required to complete the tests. Generally, routine laboratory tests, such

Section 2 Firm Qualification and Experience

— AMERICAN ASSOCIATION OF STATE HIGHWAY AND TRANSPORTATION OFFICIALS (AASHTO)

Raba Kistner's McAllen laboratory is accredited by AASHTO for the disciplines of Aggregate and Asphalt Testing, Portland Cement/Concrete Testing and Soils Testing. AASHTO is a nonprofit, nonpartisan association representing highway and transportation departments in the 50 states, the District of Columbia and Puerto Rico. It represents all five transportation modes: air, highways, public transportation, rail and water. Its goal is to foster the development, operation, and maintenance of an integrated national transportation system. This accreditation utilizes laboratory assessment and proficiency sample services provided by the AASHTO Materials Reference Laboratory (AMRL) and the Cement and Concrete Reference Laboratory (CCRL). For the initial accreditation, a laboratory must satisfy the quality assurance/quality control requirements specified in AASHTO Practice R18. An on-site assessment by AMRL and/or CCRL is made of the test methods for which accreditation is requested. The assessment verifies training of employees, calibration of equipment, and implementation of testing procedures.

— GEOPROFESSIONAL BUSINESS ASSOCIATION (GBA) PEER REVIEW

Raba Kistner has been active in GBA and its peer review program. A team of 3 to 4 experienced professionals from other member firms conducts this review over an intensive 2 to 3 day period. The team examines documents and practices related to the firm's organization, staff, work product, and professional activities. It visits and examines physical facilities, reviews manuals, reports, proposals and observes daily operations.

GBA's peer review program has been used as a model for other professions and is highly regarded on a national basis. It improves the quality of geotechnical engineering practice by GBA member

firms to better serve their clients and thus better protect public safety and welfare.

— U.S. ARMY CORPS OF ENGINEERS INSPECTIONS

Raba Kistner's McAllen laboratory is validated for construction materials testing and inspection on U.S. Army Corps of Engineers' projects. Representatives of the U.S. Army Corps of Engineers inspect the Raba Kistner laboratories and review our Quality Assurance Programs and documentation.

— CALIBRATIONS

Our laboratories are equipped with calibrated, maintained testing equipment to successfully service your geotechnical and construction projects. We have written,

detailed procedures for all calibrations, standardizations, and check activities for our equipment. The calibrations are made using equipment traceable to the National Institute of Standards and Technology (NIST).

Concrete and Materials Branch

Isidoro Arjona, P.E., P.M.P., Vice President
Raba Kistner Consultants, Inc.
800 East Hackberry Avenue
McAllen, TX 78501

Dear Mr. Arjona:

In reference to your check no. 214526, dated December 20, 2017, and audit agreement, dated December 15, 2017, an audit based on your AASHTO Accreditation was performed on documents submitted by your laboratory. We examined the AMRL On-site Assessment Report No. R21379, dated June 9, 2016, the CCRL Inspection Report No. F-413, dated June 30, 2017 and the AASHTO accreditation certificate effective January 23, 2018. Your Quality System meets the requirements of the U.S. Army Corps of Engineers. The material test methods that you are validated to perform for the U.S. Army Corps of Engineers were determined from the inspection reports from AASHTO and are as follows:

Aggregate Tests: ASTM C117, C127, C128, C136, C29, C40, C142, C566, C702, C1077, D2419, D3666, D4791, D5821, and E329.

Bituminous Tests: ASTM D2041, D2726, D2950, D3203, D3666, D5444, D6307, D6926, D6927, and E329.

Concrete Tests: ASTM C31, C39, C138, C143, C172, C173, C231, C1064, C42, C511, C617, C1077, C1231, C1542, and E329.

Soil Tests: ASTM D421, D422, D558, D698, D1140, D1556, D1557, D1893, D2166, D2216, D2487, D3740, D4318, D6938, and E329.

We will add your laboratory to the list of commercial laboratories qualified to conduct material tests for the U.S. Army Corps of Engineers, see the Materials Testing Center homepage at <http://www.erd.usace.army.mil/Media/FactSheets/FactSheetArticleView/tabid/9254/Article/476661/materials-testing-center.aspx>. All Corps offices will be notified of this decision and will have the opportunity to use your services. Raba Kistner Consultants, Inc. McAllen, TX will remain on our list of laboratories qualified to conduct material tests until **January 23, 2020** two (2) years from the date of the audit. In the event your AASHTO accreditation is suspended in whole or part, Raba Kistner Consultants, Inc. McAllen, TX is to notify the Materials Testing Center immediately to perform a re-evaluation of your laboratory's validation. Failure to notify the Materials Testing Center will result in immediate suspension of your U.S. Army Corps of Engineers validation.

Sincerely,

Alfred B. Crawley, PE
Director
Materials Testing Center

Description of Services

Engineering projects require the coordinated effort of a multi-disciplined team, working together to achieve client objectives. Raba Kistner provides consulting engineering services supported by professionals who listen and understand our clients needs. Our longevity and market strength is built upon the depth of our qualifications and experience in providing the following Professional Services:

Construction Materials Engineering and Testing

Private and public sector clients trust Raba Kistner for quality, reliable, timely Construction Materials Engineering and Testing services. Our team of trained, experienced professional engineers and field technicians partner with clients to minimize costly construction delays and future project performance problems.

We design a quality assurance/quality control (QA/QC) program specific to each project. Our QA/QC program focuses on the quality and suitability of materials used in construction, as well as the quality of workmanship. This attention to detail is reviewed by field representatives who earn certification from The American Concrete Institute (ACI).

All of our materials laboratories meet rigorous standards for testing and analysis procedures and advanced equipment calibration. The American Association of State Highway and Transportation Officials (AASHTO) has accredited our facilities in asphalt, aggregates, concrete, and soils.

Raba Kistner has earned a reputation for timely service in several key areas, including:

- Foundations
 - Pavements
 - Roofs
-
- **CONSTRUCTION MATERIALS ENGINEERING AND TESTING SERVICES INCLUDE:**
 - Concrete Strength Testing
 - Soil and Aggregate Testing
 - Post-Tensioned Concrete Testing
 - Structural and Reinforcing Steel Testing
 - Asphalt Laboratory and Field Testing
 - Portland Cement and Fly Ash Testing

Section 2 Firm Qualification and Experience

- Soils Characterization and Compaction Testing
- Reinforcing Steel Observation and Testing
- Alkali Silica Reactivity
- Failure and Causation Analyses of Materials
- Asphalt Concrete Mix Designs (including Super-Pave)
- High Performance Concrete Mix Designs
- Vibration and Blast Monitoring
- In-Place/Non-Destructive Testing of Concrete
- British Pendulum Aggregate Friction Testing
- Pile Load Testing
- Chloride Ion Permeability Testing
- Concrete Freeze-Thaw Testing
- Precast Structural Elements Testing
- Concrete Chemical Admixtures Testing
- Customized Testing, upon request

Geotechnical Engineering Services

Raba Kistner's goal is to improve our clients' project performance by putting our extensive geotechnical engineering experience to work. Since 1968, we have developed engineering solutions for complex surface and subsurface conditions.

Our professionals clearly understand the interrelationship between the geologic environment and the objectives of clients. We have worked on some of the Southwest region's largest and most significant construction projects. Over the past 50 years, our geotechnical team has successfully and continuously tailored cost-effective scopes of service to fit individual project's unique requirements. We take advantage of advanced technology including geophysical surveys and pressure meter testing.

Raba Kistner's staff strives to be responsive to our clients' schedules, comprehensive in our scope, and realistic and cost-conscious in our recommendations. Geotechnical Engineering services include:

- Engineering Geology Studies
- Forensic Studies
- Geotechnical Design Studies
- Specialty Geotechnical Services
- TxDOT Studies

Section 2 Firm Qualification and Experience

Identify the office location that will be providing the services and the approach to handling part-time staffing needs for smaller assignments.

Raba Kistner will perform all Construction Materials Testing and Geotechnical Engineering services for the City of San Juan projects through our McAllen office.

Firm: Raba Kistner, Inc.
Address: 800 E. Hackberry
McAllen, Texas 78501
Phone: 956-682-5332
Fax: 956-682-5487

Raba Kistner has more than 400 employees in twelve different offices companywide that are available as resources for these City of San Juan projects. With the necessary technology and communications systems in place, we are able to move work through each of our offices and have the added capability of additional staff available to QA/QC our work performed. Raba Kistner also has a second Valley office in Brownsville that could be called upon for assistance or Quality Control without any loss of efficiency, quality, or deadlines.

Our current workload is such that all proposed personnel can begin assignments for these projects immediately upon notice to proceed.

Our project staffing requirements are very dynamic, and we have adequate field and support personnel to service the various projects associated with this SOQ due to staff flexibility and versatility. We will be able to staff smaller assignments.

Section 3 Team Members

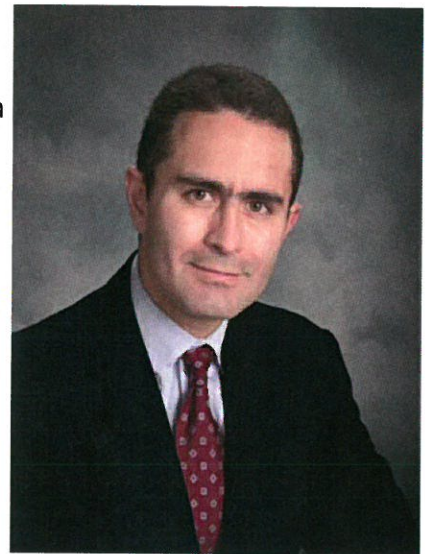

Qualifications and Experience

Our employees work and live in the area and are familiar with the local issues and concerns. Given our history of practicing professional engineering and consulting services within the Valley, we have a comprehensive database of geotechnical subsurface conditions. This aids clients such as the City of San Juan in that we are able to pull from first-hand knowledge when dealing with projects.

The Raba Kistner McAllen Office employs more than 40 staff members. Given our previous and current experience working with the City of San Juan, we trust you are familiar with the quality of work that each of these individuals provides.

Project Manager

Mr. Isidoro Arjona, PE, PMP, F. ASCE Sr. Vice President will serve as Project Manager overseeing all Geotechnical Engineering and Construction Materials Testing services provided for the City of San Juan projects. With more than 25 years of experience, Mr. Arjona serves as Senior Vice President overseeing all operations in the Rio Grande Valley (RGV). He is responsible for the management, administration, and coordination of subsurface reconnaissance studies, soil investigations, shallow and deep foundation recommendations, pavement design and analyses, construction materials engineering, quality control/quality assurance, due diligence studies, forensic investigations, and a number of environmental site assessments for residential, commercial, and industrial projects, as well as various infrastructure projects with local, state, county, and federal agencies in South Texas, México, and along the Texas/México border. Mr. Arjona's experience includes water and wastewater related projects; streets/roadways; bridge replacements; commercial properties; residential subdivisions; manufacturing facilities; sports arenas/complexes; and educational, health, and financial institutions.

Applicable resumes are provided on the following pages for each employee involved in these City of San Juan projects.

Katrin M. Leonard, PE

ASSOCIATE

PROJECT ROLE: GEOTECHNICAL ENGINEERING TASK LEADER

Ms. Leonard is recognized for her commitment to meeting client objectives for prompt and practical facilities engineering solutions. As a Project Professional for seven years with Raba Kistner's Rio Grande office, she has assumed progressive responsibility in management, administration, and coordination of geotechnical and facilities services throughout South Texas, the Texas/México border, and Northern México.

Ms. Leonard earned her Bachelor of Science degree in Civil Engineering from Carleton University in Ontario, Canada. She is registered as a Professional Engineer by the State of Texas.

On a day-to-day basis, Ms. Leonard provides project management in several areas of facilities engineering. Her project assignments address subsurface reconnaissance studies, soil investigations, residential observation, and foundation and pavement design recommendations. Her responsibilities include preparation, design and analysis, and review of plans, specifications, reports, and cost and quantity estimates for industrial, commercial, residential, and educational projects.

Ms. Leonard has had the opportunity to excel at a diversity of significant projects. Working as a team and on her own, she has experience in project management/administration of numerous educational and institutional health facilities, bank buildings, retail shopping centers, water and wastewater treatment plants for city and state Economically Distressed Area Programs, and transportation efforts, including airports, communication towers, and streets.

Ms. Leonard is dedicated to her profession and community. She volunteers time to numerous organizations and continues to enhance her engineering qualifications through regular participation in professional training seminars. Through Ms. Leonard, Raba Kistner maintains and builds its reputation for quality professional services.

Section 6 Financial and Legal Status

- A.) LIST ANY ACTIONS TAKEN BY ANY REGULATORY AGENCY AGAINST OR INVOLVING THE FIRM OR ITS AGENTS. B.) LIST ALL LITIGATION AGAINST OR INVOLVING THE FIRM OR ITS AGENTS OR EMPLOYEES WITH RESPECT TO ANY WORK PERFORMED

- LITIGATION STATEMENT

Raba Kistner, Inc. (Raba Kistner) performs more than 1,000 projects a year across the state of Texas involving highly complex and expensive projects often exceeding \$500 million and is occasionally listed as a related defendant in legal proceedings. Raba Kistner has been in business 50 consecutive years. We are currently not involved in any litigation whose outcome in any way would impact our ability to provide the services that Raba Kistner routinely performs for our clients, including the services listed in this RFQ. We vigorously defend each allegation and, to date, have not been found liable as a result on any lawsuit.

- C.) ALL INSURANCE COVERAGE THAT THE FIRM HAS WHICH WOULD BE APPLICABLE TO THE WORK PROPOSED.

Please see Section 5 Insurance

Section 7 Professional Services Agreement

Professional Services Agreement

Raba Kistner has read the Professional Services Agreement and will meet the prerequisite insurance requirements and if selected agrees to enter in to the agreement.

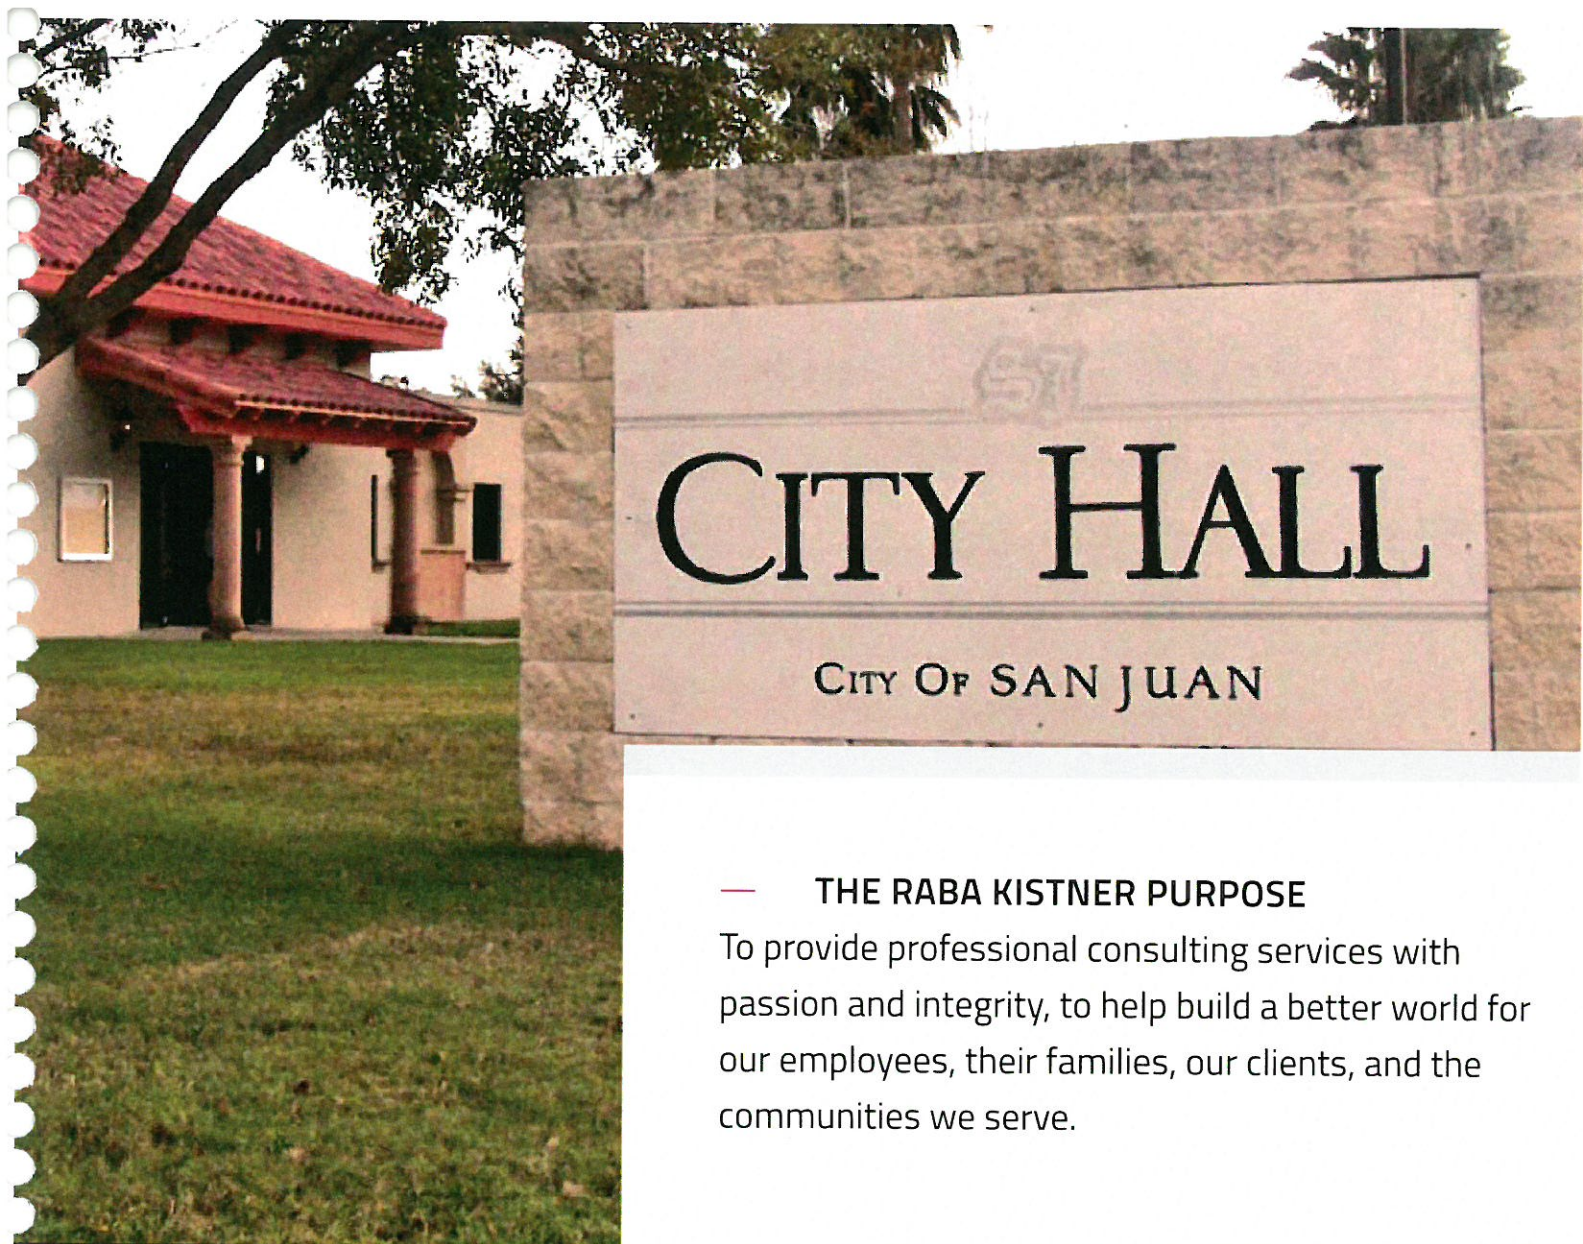

Section 8 DBE Program Compliance

Raba Kistner will comply with the Texas Water Development Board's DBE program and Six Good Faith Effort Steps.

If subconsultants are utilized on this contract Raba Kistner will ensure DBE's are made aware of the contracting opportunity to the fullest extent practicable through outreach and recruitment activities.

Raba Kistner will make information on forthcoming opportunities available to DBEs and arrange time frames for contracts and establish delivery schedules.

Raba Kistner will utilize assistance of several agencies including the Texas Procurement and Support Services, Small Business Administration, TxDOT, City of Austin and the City of Houston resource pages when we need to identify DBEs.

— THE RABA KISTNER PURPOSE

To provide professional consulting services with passion and integrity, to help build a better world for our employees, their families, our clients, and the communities we serve.

Request for Qualifications for Geotechnical
Services RFQ #18-68-05-31

TRANSMITTAL LETTER

Millennium Engineers Group

MEG ENGINEERS

Consultants - Geotechnical - Testing

May 29, 2018

Mr. Rene J. Jaime
Purchasing/Risk Manager
City of San Juan
709 S. Nebraska Ave.,
San Juan, Texas 78589-2649

Re: Request for Qualifications for Geotechnical Services Sealed Proposals #18-68-05-31

Dear Mr. Jaime,

The City of San Juan is looking for the most qualified engineering consultant to work with the city to provide geotechnical engineering services for the City of San Juan projects. Millennium Engineers Group, Inc. (MEG) is that firm. We believe that MEG is the right choice for the city based on the following:

History of Stability and Strong Rio Grande Valley Presence

MEG is a locally owned corporation that has never been sold or acquired, or merged with other entities. Furthermore, Mr. Raul Palma, P.E. President and Owner of MEG has 36 years of engineering experience in the Rio Grande Valley and is the former TxDOT Pharr District Materials Engineer. In May of 2014, we recently moved into our new two building, 9000 sf. testing facility. MEG is stable and we have invested in the future. We are consistent and we're not going anywhere. ***We are confident that the people and company you see in the Rio Grande Valley today will be the people and company you see for the life of your projects***

Experienced Project Manager

As your project manager, I have spent over 36 years working on Rio Grande Valley projects including 17 years as the president and chief engineer of MEG completing various successful projects for The City of San Juan.

Pride in Execution

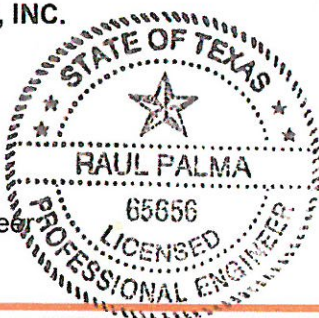

MEG is acutely aware of the financial and management challenges facing most cities these days. We are committed to:

- Working to identify and implement projects in the most cost effective manner.
- Communicating closely with the city to meet your requirements and schedule.
- Knowledge of geotechnical solutions for cost effective construction methods.
- Dedicated to quality: **AASHTO** and **USACE** accredited laboratory.

Our team is thrilled about the opportunity to serve The City of San Juan and is ready to start immediately upon selection. If you have any questions or would like to discuss our approach or team capabilities in greater detail, please contact me at anytime at 956/702-8500, 956/648-4488 or at rpalma@megengineers.com. Thank you for your consideration.

Respectfully,
MILLENNIUM ENGINEERS GROUP, INC.
TPBE Firm No.: F-3913

Raul Palma, P.E.

Firm Qualification and Experience

In the Rio Grande Valley MEG is

Innovative

Responsive

Professional

Convenient

Reliable

Our Services

Geotechnical Engineering

Construction Materials Testing

Consulting

Forensics

Millennium Engineers Group, Inc. (MEG)
provides complete geotechnical engineering

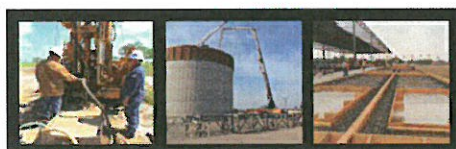

and consulting services, construction material engineering and testing, forensic testing and consulting services, environmental testing and consulting services to its client base of government and municipal agencies, educational institutions, architects, engineers, real estate developers, constructors, and private sector clients. Our strength is our people; combining their experience and collaborating as a unit enables us to quickly identify our roles and deliver accurate cost effective deliverables. Whether defining a new working relationship or continuing on to the next project our mission remains the same: to achieve yours.

History

MEG was founded in 2001 by Mr. Raul Palma, P.E. on the principles of honesty, integrity, and service. The goal to provide innovative geotechnical and material testing services, continue to raise the level of quality in the local profession, and make a difference in the community. Today, MEG provides a full range of integrated geotechnical engineering and consulting services, construction material engineering and testing, forensic testing and consulting services, environmental testing and consulting services. Our philosophy and practices have been positively reflected in both client and employee loyalty and contribute to a steady growth in a diversity of projects.

Quality Accreditation and Business Certification

- MEG is accredited by the **American Association of State Highway and Transportation Officials (AASHTO)** and the **United States Army Corps of Engineers (USACE)**. MEG is audited by an independent AASHTO & USACE auditor, as part of our accreditation process.
- MEG is a minority owned and operated business certified as:
 - **Historically Under-utilized Business (HUB)**
 - **Small Business Enterprise (SBE)**
 - **Minority Business Enterprise (MBE)**
 - **Emerging Small Bus. Enterprise (ESBE)**
 - **Hispanic American Bus. Enterprise (HABE)**
- MEG meets the requirements for ASTM E329 Standard of Recommended Practice for Inspection and Testing Agencies, and maintains yearly proficiency testing samples to AASHTO, USACE, TxDOT, and TxAPA.

Firm Qualification and Experience

Personnel

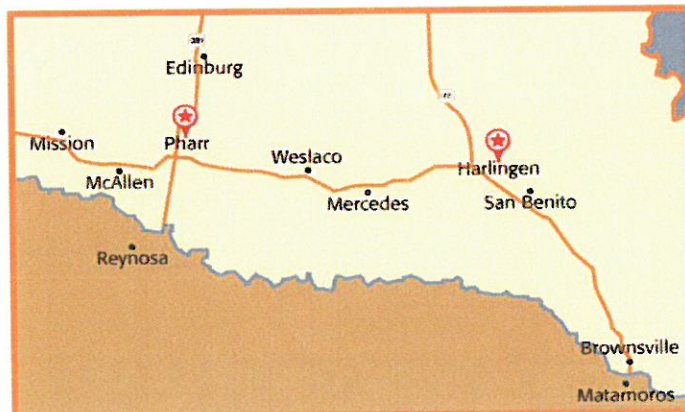

- 3 Registered Professional Engineers
- 1 Engineer in Training
- 1 Materials Testing Manager
- 1 Geotechnical Manager
- 1 CMT Supervisor / Dispatcher
- 1 Geotechnical Drilling Crew
- 17 Engineering Technicians
- 1 CAD Designer
- 4 Administrative Staff

Millennium Engineers Group, Inc. (MEG) has the ability to meet your schedule and deadline because of its thorough training and understand of its CLIENTS needs, its resources, MEG's resources, MEG's subcontractors' resources, and industry requirements. MEG employs a staff of 30 individuals comprising of geotechnical engineers, engineering technicians, inspectors, and support staff. Our firms has personnel and laboratory equipment to provide geotechnical engineering and construction materials testing services in the following areas.

Equipment

- Atterberg Limits
- Moisture Contents
- Minus No.200 Sieve Analysis
- Dry Sieve Analysis
- Moisture Density Relationships
- Density Testing
- California Bearing Ratio (CBR)
- Optimum Cement or Lime Content for Stabilization of Soils
- Classification of Soils
- Hydrometer
- Consolidation
- Triaxial Testing
- Unconfined Compression
- Deleterious Material Determination
- Decantation of Aggregates
- Wet Ball Mill
- Ph Testing
- Aggregate Resistivity Testing
- Aggregate Soundness
- Concrete Testing
- Asphalt Testing
- Mortar and Grout Testing
- Concrete Material Designs
- Hot Mix Asphaltic Concrete Designs
- 2-Concrete Compression Machines
- 1-Three Point Conc. Beam Compression
- 5-Ovens
- 6-Measuring Scales
- 1-Concrete Curing Room
- 2-Concrete Saws
- 1-Asphalt Ignition Oven
- 1-Asphalt Gyratory Press
- 5-Manual Proctor Hammer
- 1-Automatic Proctor Hammer
- 1-Hveem Stability
- 1-Gilson 50 Gallon Sample Shaker
- 1-Sand Equivalent
- 2-Computerized One Dimensional Consolidation Frames
- 1-Computerized Triaxial Load Frame
- 4-Sieve Analysis Shakers
- 3-Sample Splitters
- Sulfate Testing

Project Commitment

MEG is committed to your projects, program, goals, and timelines for project schedule. We will provide the essential staff, equipment and resources to be available and responsive daily for the geotechnical engineering, construction materials testing/inspection services for the proposed projects. Our Pharr, Harlingen and Laredo office's are equipped and trained to provide the level of service and responsiveness required by proposed projects. MEG has extensive local resources and expertise to complete large project programs. The key personnel presented in this Statement of Qualifications are committed to the proposed projects and will be available throughout the life of the project.

■ Project Communication

Communication is the key to all successful projects. The management of the testing and inspection program for the project will begin with the introduction of the project team members. Upon notification of award, our engineers and staff will meet with members of the project team who have an active role in the project. This is a critical phase in to communicate project information, goals, timelines, or potential conflicts.

■ Review of Construction Schedule

MEG will review the most up-to-date construction schedule by task after design documents are completed. The testing and inspection program can best support regulated testing and control final testing costs if we clearly understand the project testing requirements.

■ Construction Meetings

From the initiation of the project until the completion, we propose biweekly or monthly management meetings with the construction manager or his representative and other project team members. At these meetings it is necessary, to review and discuss testing results, project progress, and project schedule.

■ Daily Communication

MEG on site representative will maintain daily communication with the contractor's superintendent, and the designated project team members in order to schedule the required services and to communicate inspection and test results. Our project manager will communicate the results of critical off-site testing and inspections to the designated project team representatives the same day testing is performed.

RECENT EXPERIENCE WITH MUNICIPALITIES

MEG understands the needs and goals of municipalities during times of growth and this economy. We have experience working on similar projects involving geotechnical engineering & construction material testing services. Below is a recent list of local municipalities we have recently worked with for your consideration:

City of Harlingen

City of La Feria

City of Los Fresnos

City of Progresso

City of Los Indios

City of Edinburg

City of Pharr

City of Weslaco

City of Alamo

City of Elsa

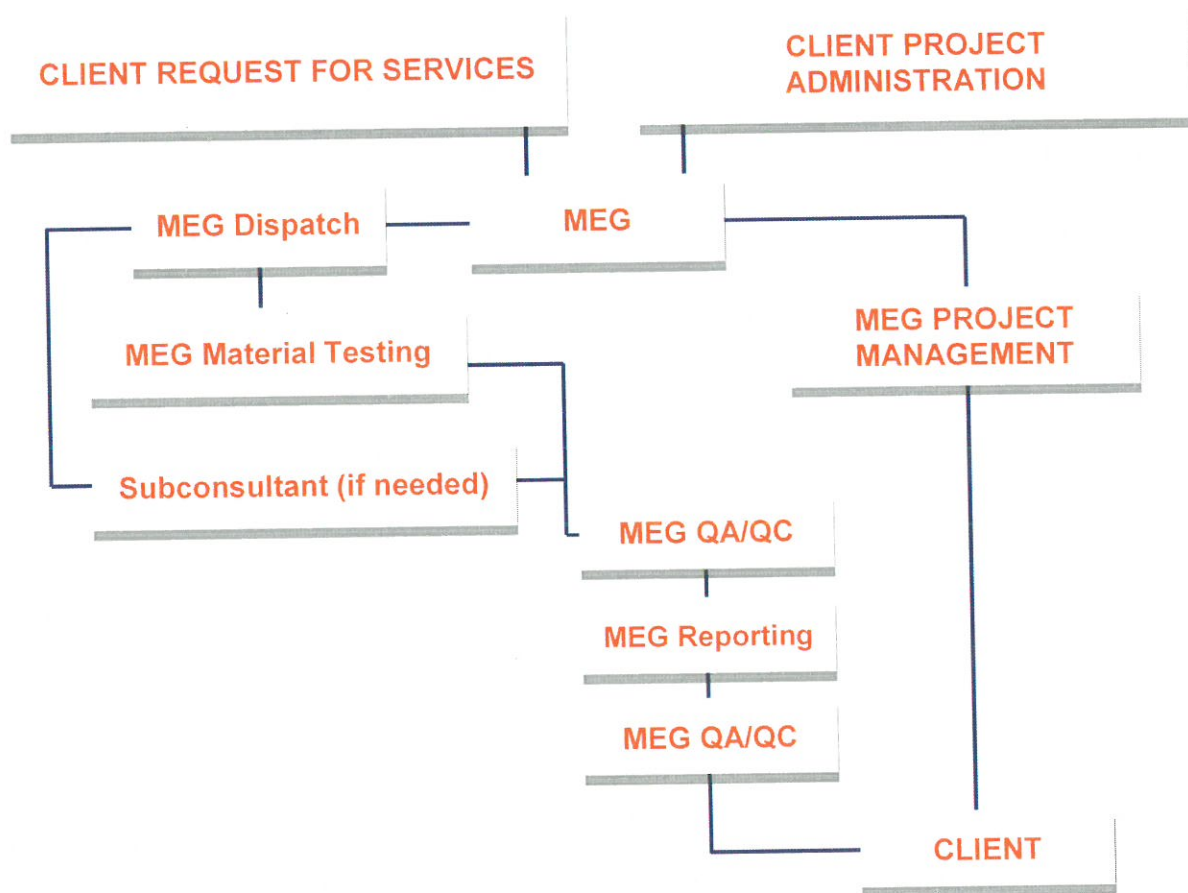

City of Rio Grande City, Roma, Escobares, La Joya

City of Hidalgo, Palmview, Palmhurst, La Villa

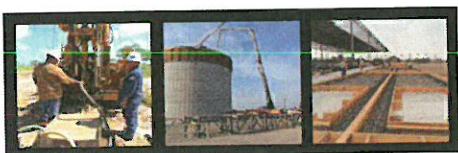

Management Plan

MEG will manage the project by implementation of the project team, project understanding, project approach, and organizational chart provided in this submittal. Mr. Raul Palma, P.E. will be the project task leader and will be responsible for the implementation of the management plan. If needed an environmental subconsultant will provide services on an as needed basis if applicable. MEG and the subconsultant are corporations of the State of Texas. The lines of authority and communication will be as follows:

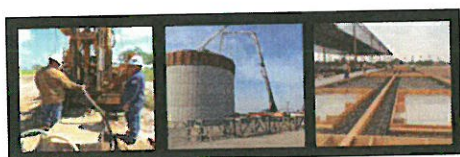

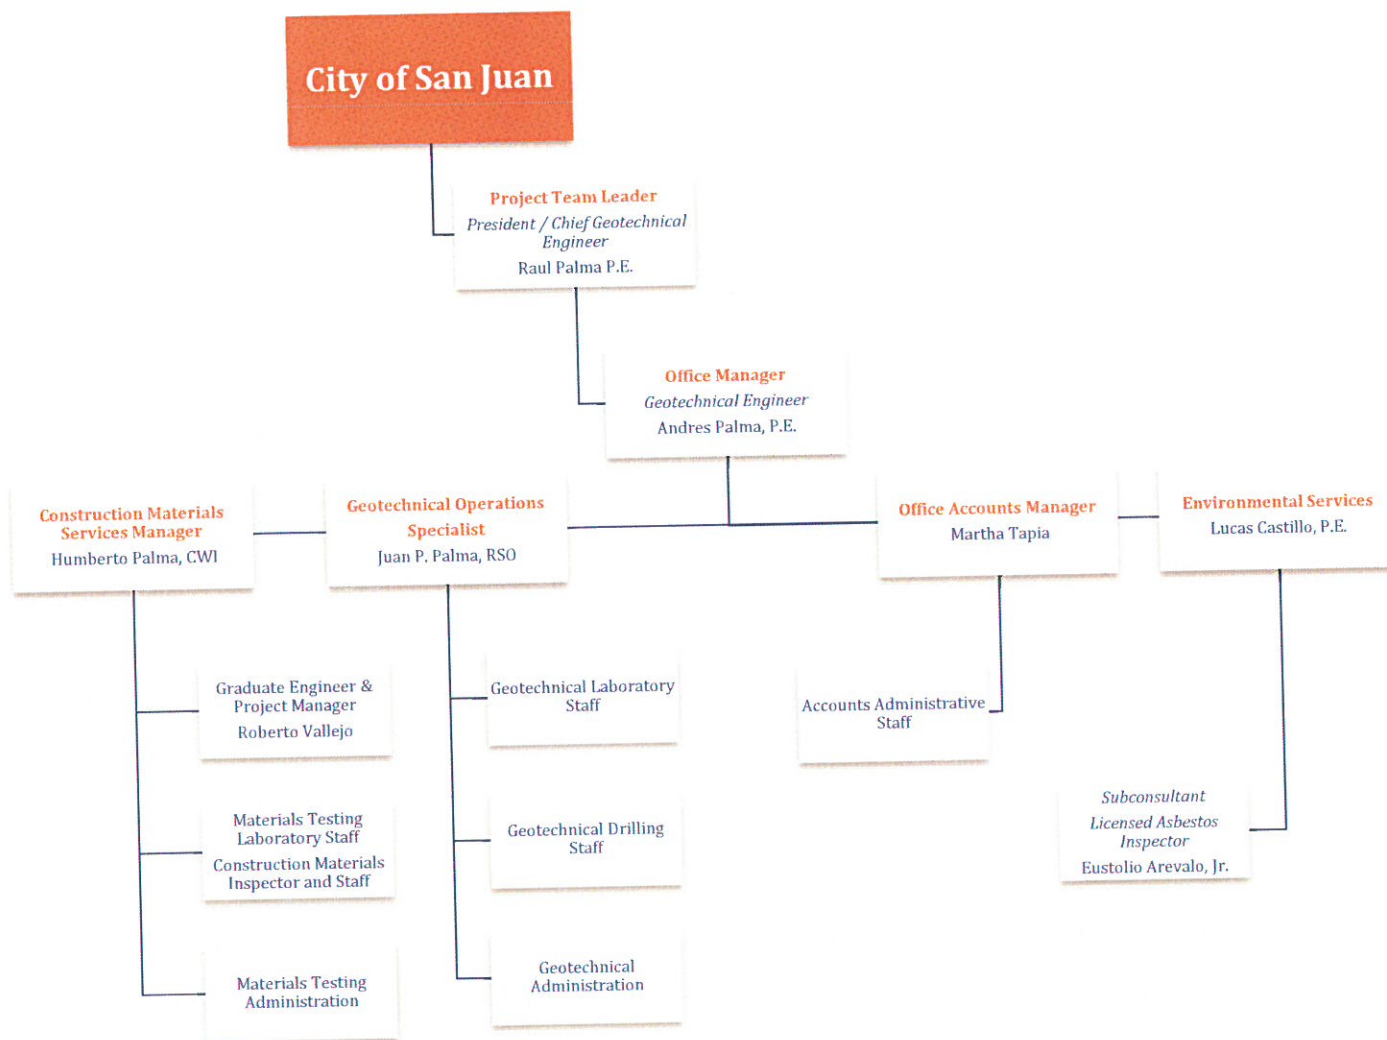

MEG will manage the personnel used for the project by the Current Workload/Firm Availability section of this submittal. The coordination and exchange of information can be sent electronically via email, on cloud computing via a shared server or any other method the CLIENT may want to utilize. The CLIENT will designate on our project information sheet which parties will receive project information and/or project reports.

Project Team

MEG proposes to utilize the latest measurement techniques to effectively perform the services of this agreement with our current staff as proposed in our organization chart. We understand that we need to respond quickly to some service requests, and we are practiced in having staff available on short notice, if necessary. Our current and projected workloads are such that we are confident of our ability to meet the city expectations in terms of having appropriate staff resources available when they are needed. The organization chart below reflects the staff we anticipate using for the proposed projects; however, we have additional personnel that can also be utilized if needed.

Project Name: Pharr Produce District Industrial Park

Dates: GEO 12/2011-1/2012, CMT 5/2013-3/2014

Prelim. Estimates: GEO \$8,000 , CMT \$70,000

Final Cost: GEO \$8,000 , CMT \$65,000

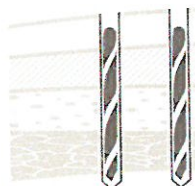

Client: City of Pharr

Contact: Mr. William F. Ueckert Jr., P.E.

Address: 118 South Cage Blvd.

Pharr, Texas 78572

Phone: (956) 702-5335

Description: MEG performed the geotechnical engineering study for this 300 acre site for the planned cold storage distribution and storage operations. The geotechnical engineering report consisted of a field sampling and laboratory testing program to provide geotechnical recommendations for site improvements and a lift station structure. MEG completed the pavement design for the heavy duty industrial roadways considering the site challenges of high plasticity clay soils and a high water table. MEG also provided construction materials testing, inspection, and observation services during the construction of this project to review the implementation of our geotechnical findings, review material submittals that were to be used during construction, and provide testing, inspection, and observations services to verify the construction methods and materials met the project specifications.

AASHTO and US ARMY CORPS Accreditation

We're Committed to Quality

MEG is an independent, licensed, engineering firm providing Geotechnical Investigations, Foundation Engineering, Consulting, and Quality Control Testing and Inspection services. Located in Pharr, Texas, our quality management system and testing facility are **accredited by the AASHTO Accreditation Program (AAP) and the United States Army Corps of Engineers (USACE)**. From the brightest civil engineers of today to field technicians and inspectors with over 36 years of experience, our staff is qualified by rigorous internal training and independent certification programs to ensure delivery of quality professional services.

American Association of State Highway and Transportation Officials AASHTO Accreditation Program Certificate of Accreditation

This is to signify that

Millennium Engineers Group, Inc.

in

Pharr, Texas

has demonstrated proficiency for the testing of construction materials and has conformed to the minimum requirements established in AASHTO R 18 set forth by the AASHTO Highway Subcommittee on Materials (HSOM).

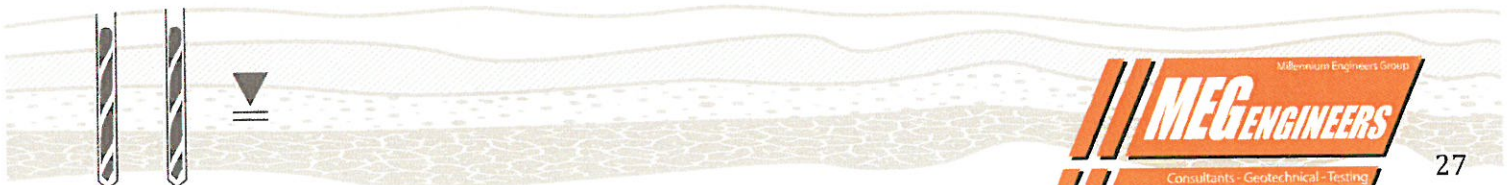

The scope of accreditation can be viewed on the AAP Directory of Accredited Laboratories on www.amrl.net.

Reply to the Attention of:
Concrete and Materials Branch

Humberto Palma
Millennium Engineers Group, Inc.
P O Box 4589
Edinburg, TX 78540

Dear Mr. Palma:

In reference to your check no. 3481, dated March 28, 2017, and audit agreement, dated March 29, 2017, an audit based on your AASHTO Accreditation was performed on documents submitted by your laboratory. We examined the AMPL On-site Assessment Report No. 21683, dated June 3, 2016 and the AASHTO accreditation certificate effective June 2, 2017.

Your Quality System meets the requirements of the U.S. Army Corps of Engineers. The material test methods that you are validated to perform for the U.S. Army Corps of Engineers were determined from the inspection reports from AASHTO and are as follows:

Aggregate Tests: ASTM C117 and C136.

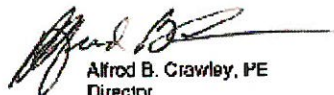

Blumious Tests: ASTM D2723.

Concrete Tests: ASTM C39 and C1231.

Soil Tests: ASTM D638, D1140, D1557, D2216, and D4318.

We will add your laboratory to the list of commercial laboratories qualified to conduct material tests for the U.S. Army Corps of Engineers; see the Materials Testing Center homepage at <http://www.erc.usace.army.mil/Media/FactSheets/FactSheetArticleViewTable/9254/Article/473661/materials-testing-center.aspx>. All Corps offices will be notified of this decision and will have the opportunity to use your services. Millennium Engineers Group, Inc., Pharr, TX will remain on our list of laboratories qualified to conduct material tests until June 2, 2019 two (2) years from the date of the audit. In the event your AASHTO accreditation is suspended in whole or part, Millennium Engineers Group, Inc., Pharr, TX is to notify the Materials Testing Center immediately to perform a re-evaluation of your laboratory's validation. Failure to notify the Materials Testing Center will result in immediate suspension of your U.S. Army Corps of Engineers validation.

Sincerely,

Alfred B. Crawley, PE
Director
Materials Testing Center

MEG ENGINEERS

Consultants - Geotechnical - Testing

Raul Palma P.E.

Principal Engineer

PROFESSIONAL EXPERIENCE

Mr. Palma is a licensed Professional Engineer with over 36 years of experience in geotechnical engineering, construction materials testing, management, and engineering design of highways, streets, and utilities. Mr. Palma has directed and completed a wide variety of geotechnical projects throughout the South Texas region. As President and Chief Geotechnical Engineer of the Pharr, Texas office, he is responsible for overall operations management of the Pharr Office.

As geotechnical project manager, he is responsible for coordination and completion of geotechnical engineering projects. His experience includes subsurface explorations, laboratory testing, foundation investigation and design; slope stability assessments and remediation design, pre-load fill design; geotechnical plans and specifications preparation; and construction monitoring. Client relationships have included city and county agencies; engineering and architectural firms; municipal and utility districts, as well as private developers and constructors.

During Mr. Palma's employment with the Texas Department of Transportation (TxDOT), Mr. Palma gained an extensive background in the area of geotechnical and materials engineering serving as the District Materials Engineer for a centralized laboratory for TxDOT in the Pharr District located in Pharr, Texas. As the District Materials Engineer he was responsible for overseeing the testing and approval of materials for all construction projects in the Cameron, Hidalgo Starr, Zapata, Jim Hogg, Brooks, Willacy and Kennedy counties. At the end of his tenure with TxDOT, the Pharr District had a construction program of approximately \$170 million dollars of construction per year. He oversaw all the geotechnical exploration and soil testing for all bridge and retaining wall structures in these same

Humberto Palma, CWI

CMT Laboratory Manager

Certified Welding Inspector (CWI)

PROFESSIONAL EXPERIENCE

Mr. Palma serves as construction materials testing manager of MEG's Pharr, Texas office. He has over 16 years experience in the engineering & construction industry and vast knowledge in construction materials testing, quality assurance/quality control, and project management in the South Texas area. Construction Material Testing projects that Mr. Palma has been involved with include mixed-use developments, educational facilities, commercial low-rise to mid-rise buildings, water and wastewater treatment facilities, elevated water towers, industrial facilities, multi-family developments, churches, residential subdivisions and general retail centers.

Mr. Palma's responsibilities as a Construction Materials Testing Manager include coordination of field personnel, communication with the client, generation of daily logs and weekly status reports, training of technicians, evaluating laboratory and field construction materials testing data, and scheduling and managing field personnel.

Mr. Palma's responsibilities as a Project Manager include pre-construction documentation, project budget analysis, technical report review, project billing, daily/weekly reporting with clients, attending pre-construction meetings, budget review, and job-site visits. He has experience managing a wide range of projects in both the construction and quality assurance fields.

FINANCIAL AND LEGAL STATUS

FINANCIAL REFERENCE

MEG has good financial standing and a relationship with the same financial institution for over 17 years.

Their contact information is as follows:

Mrs. Alicia Snell
Highway District 21 Federal Credit Union
800 W. Ferguson Avenue
Pharr, Texas 78577
956/787-2701

CONTRACTS

MEG is blessed and excited to have been selected for various contracts on an as needed basis for Geotechnical Engineering and Materials Testing to local entities. Our experience working with other local entities is extensive and some of the current contracts on hand in the Rio Grande Valley are as follows:

Hidalgo County Precinct No. 1, 2015-2016 unit rate contract

Hidalgo County Drainage District, 2015-2016 unit rate contract

Valley International Airport, 2014-2015 unit rate contract

McAllen ISD, 2013-2015 unit rate contract

Brownsville ISD, 2014-2016 unit rate contract

Edinburg CISD, 2015 - 2017 unit rate contract

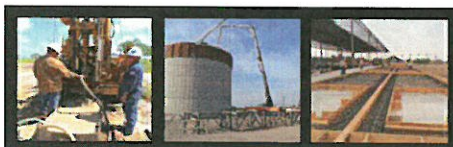

South Texas College, 2015-2017 Non-Bond Projects unit rate

South Texas College, 2015-2017 2014 Bond Projects unit rate

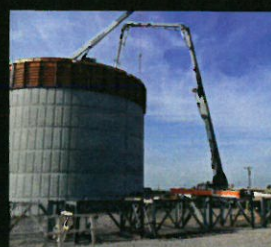

La Joya ISD 2013 - 2013 unit rate contract

City of Pharr, 2016-2018 unit rate contract

City of Weslaco, 2014-2015 unit rate contract

PROFESSIONAL SERVICES AGREEMENT

PROFESSIONAL SERVICES AGREEMENT

MEG has thoroughly reviewed the Request for Qualifications document and/or addendums and has prepared this professional services statement of qualifications submittal for professional services on an as needed basis for Geotechnical Engineering and Materials Testing. The sample Professional Services Agreement in the Request for Qualifications document has been read and MEG will meet the prerequisite insurance requirements and contract obligations. MEG agrees to enter into agreement with the CLIENT if selected for the professional services as set forth in the Request for Qualifications.

INSURANCE COVERAGE & LEGAL

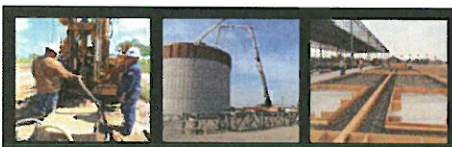

MEG does not have any key terms of our errors and omissions insurance coverage. MEG maintains the insurance policies needed for this contract as for all additional contracts listed below.

2 million professional liability coverage

1 million commercial general liability coverage

1 million umbrella liability coverage

MEG does not have any claims, judgments, and arbitration proceedings, suits pending or outstanding against itself or its officers. MEG meets the legal requirements of this request for qualifications as well as all the requirements required by the State of Texas and the Texas Board of Professional Engineers. MEG is a professional engineering firm registered in the State of Texas that has complied with all of its obligations, certifications, accreditations, licenses, and procedures required to operate in the State of Texas and be accredited by USACE and AASHTO.

SOQ - GEOTECHNICAL SERVICES

18-68-05-31

Transmittal Letter

Indicate interest and commitment to perform services for the City of San Juan, include contact information (physical address, telephone, cell phone, and email address) for the primary person responsible for your RFQ who will be the point of contact for the City on all correspondence and communications pertaining to the RFQ. State whether any addendums to this RFQ have been received by your firm and whether consideration of their content has been included in your RFQ. The letter must be signed by an officer of the firm who is authorized to bind the firm to contract and shall contain a statement to this effect.

Divider 1 - Firm Qualification and Experience

Discuss the firm's experience and history in performing Geo-Technical Engineering Services in a timely manner, particularly for other government agencies in the past five (5) years. Discuss the firm's uniqueness to best perform these services for the City. Identify the office location that will be providing the services and the approach to handling part-time staffing needs for smaller assignments.

Divider 2 – Team Member Qualifications and Experience

Submit resumes summarizing qualifications and experience of project manager, key staff and any support staff likely to be assigned to the work.

Divider 3 – References

Provide at least three (3) references (names and current phone numbers) from recent work and List all past projects with the City of San Juan for each proposed team member. Include a brief description of the projects associated with the reference, and the role of the individual.

Divider 4 – Insurance

Provide information on the types and amounts of insurance carried by the PSP, including General Liability, Auto Coverage, Worker's Compensation, and Professional Liability Coverage. Include a list of any insurance claims against the firm within the past five (5) years.

Divider 5 – Financial and Legal Status

- A.) List any actions taken by any regulatory agency against or involving the firm or its agents.
- B.) List all litigation against or involving the firm or its agents or employees with respect to any work performed.
- C.) All insurance coverage that the firm has which would be applicable to the work proposed.

Divider 6 – Professional Services Agreement

Provide a statement that the Professional Services Agreement has been read, that the firm will meet the prerequisite insurance requirements, and that the firm, if selected, agrees to enter into such an agreement.

Divider 7 – Other

Certifications

May 31, 2018

Mr. Rene J. Jaime
Purchasing/Risk Manager
City of San Juan
709 S. Nebraska Ave.
San Juan, Texas 78589-2649

**SUBJECT: Statements of Qualifications for Geotechnical Services
RFQ 18-65-05-31**

Dear Mr. Jaime,

Terracon Consultants, Inc. (Terracon) is pleased to submit the appended Statement of Qualifications (SOQ).

Terracon is a multi-discipline consulting engineering firm. Our services include:

- Environmental Studies (Engineering and Consulting)
- Facilities
- Geotechnical Engineering (Soils)
- Materials Testing, Engineering and Observation

This SOQ has been prepared to demonstrate our capabilities to perform the requested professional engineering and testing services in a timely manner. This proposal is valid if authorized within 90 calendar days from the proposal date. Mr. Jorge A. Flores, P.G., Principal/Pharr Office Manager will be available if you have any questions concerning our SOQ.

Mr. Flores is located in our **Pharr Office** (1506 Mid-Cities Drive, Pharr, Texas; 78577) and can be reached at the office at (956) 283-8254, via cell phone at (956) 245-2319, or by email at jorge.flores@terracon.com. Mr. Flores is a proud member of the Pharr Rotary Club which services all PSJA ISD schools with civil projects. *Mr. Flores is authorized to bind Terracon to the provisions of this SOQ and conduct final contract negotiations on behalf of the firm.* No addendums were received in regards to this Request for Qualifications.

If you have any questions, please do not hesitate to contact him at your convenience. We look forward to continuing working with you and the City of San Juan.

Very Truly Yours,
Terracon Consultants, Inc.

Jorge A. Flores, P.G., Principal
Office Manager

DIVIDER 1

FIRM QUALIFICATION AND EXPERIENCE

Discuss the firm's experience and history in performing Geo-Technical Engineering Services in a timely manner, particularly for other government agencies in the past five (5) years. Discuss the firm's uniqueness to best perform these services for the City. Identify the office location that will be providing the services and the approach to handling part-time staffing needs for smaller assignments.

Terracon Consultants, Inc. (Terracon) is a dynamic and growing consulting firm (corporation) providing multiple related service lines to clients at local, regional and national levels. Our services are delivered on a timely basis with consistently high value and attention to client needs. Services include:

■ Environmental ■ Facilities ■ Geotechnical Engineering ■ Materials Testing

Since 1965, our employee-owned firm has delivered success for clients and employees. We help our clients succeed in their business ventures by effectively executing projects, controlling costs, and managing risk. Our clients appreciate this approach, and they know that we intend to be with them for the long term. Terracon's Pharr office has qualified certified technicians and a reputable engineering staff giving us the ability to respond quickly to our client's needs. Our responsiveness, high quality deliverables, practical solutions and competitive fees afford clients with a way of doing business that saves time and money.

Terracon has over 140 offices nationwide located in 39 states. In Texas, Terracon currently has more than 500 personnel with offices in Austin, College Station, Corpus Christi, Conroe, Dallas, Dallas North, El Paso, Ft. Worth, Freeport, Houston, Laredo, League City, Lubbock, Lufkin, Midland, Pharr, San Antonio, and Tyler. **The Pharr office will provide consulting services for the City of San Juan contract as needed. Mr. Jorge A. Flores, Principal/Office Manager will be available should you have any questions concerning this SOQ.**

Terracon Consultants, Inc. and its subsidiary companies was ranked number 24 in the 2018 Engineering News-Record (ENR) Top 500 Design Firms list and number 9 in Top 100 Pure Designers List, up six spots from number 30 last year and up three spots from number 12 respectively.

Terracon has been providing a full range of environmental engineering, geotechnical engineering and construction materials testing services for numerous municipalities, architects, engineers and contractors throughout the South Texas area for more than 20 years. **The projects Terracon have completed illustrate the diversity and depth of our engineering knowledge and have ranged from small streets to the new conference center for Doctor's Hospital at Renaissance to the 32-story Sapphire Condominium in South Padre Island.**

At Terracon, safety is a core value. It is also an operational priority for each project and emphasizes an Incident and Injury-Free (IIF) culture in our offices. IIF is about care and concern for people. It is Terracon's personal and organizational commitment at all levels of the company, including all employees going home safe to their family each and every day. Working in an IIF manner requires courage, trust, and strong personal and organizational commitment. Terracon holds our employees responsible, not just for their own safety and well-being, but for that of everyone around them. Working safely is an inseparable part of working correctly.

Each local Terracon office, with access to the extensive geotechnical experience and expertise of engineers, geologists, and soils technicians throughout our company, can help to assess the risks associated with subsurface conditions. We participate as a vital member of the project team, focusing on project objectives and using innovative technologies to provide practical design recommendations. Our culture, systems, and structure enable us to excel at both small and large projects. Our geotechnical services include:

- Subsurface exploration and testing
- Foundation analysis and design
- In-situ testing and performance monitoring
- Earth structures, slopes, and retention systems
- Dynamic analysis and evaluation
- Soil stabilization and ground improvement
- Groundwater control
- Pavement design and subgrade evaluation

With more than 250 geotechnical engineers, Terracon is well positioned to deliver quality, responsive, and cost-effective geotechnical engineering services, regardless of project size.

Proper selection, quality and workmanship of construction materials play a vital role in ensuring that today's buildings and infrastructure perform adequately during long time periods. We work with clients to minimize material replacements, reduce the likelihood of deterioration, avoid potential failures, and investigate and evaluate construction materials related problems and failures when they do occur.

Local knowledge and resources, combined with the technical support available from our national network of offices, enable Terracon to respond quickly to ever-changing construction needs and schedules. We respond with innovative solutions and alternatives that target your long-term performance objectives while considering cost consequences. Our services are delivered on a timely basis with consistently high value and attention to client needs.

Our construction materials services include:

- Plans Review
- Earthwork Services
- Density Testing
- Post Construction Services
- Foundation Inspection Services
- Concrete Services
- Structural Steel Services
- Other Laboratory Construction Testing for Infrastructure and/or Building Projects

We believe that a process must be implemented and well managed to help avoid cost overruns, change orders, and delays. It is a team effort that must receive priority attention from all involved. Important steps in this process include:

Geotechnical Engineering Services

1. Discuss the scope of the project with owner and team members. Determine expectations, critical issues, and schedule.
2. Prepare scope of services, with fee proposal, for geotechnical services to include:
 - Location, quantity and depth of borings
 - Anticipated laboratory testing
 - Engineering analysis, recommendations, and report preparation
3. After receiving Notice-to-Proceed, coordinate field services which include:
 - Access to boring locations
 - Utility locates
 - Special considerations (noise, time of day, security, etc.)
4. Involve subcontractors as necessary to complete the field and lab phases of the project
5. Issue draft report for review
6. Review comments and complete the report

The Project Manager will be the primary point of contact and will receive support as necessary from subcontractors, Terracon staff, and senior personnel. Design and construction of functional, cost-effective structures require a thorough understanding of local soil, rock, and groundwater conditions. Terracon provides a wide range of services to support all phases of a project, from preliminary design through completion of the building process.

Construction Materials Testing Services

1. Defining the required tests and inspections based on project documents.
2. Determining who the person will be that actually schedules our services. Make sure that this person knows what is required and what is not required. Make sure that this person knows how to schedule our services.
3. Establishing procedures for reporting/record keeping/payment of retests, failures, etc.
4. Establish contact information to include the following with respect to report distribution:
 - Names/Phone Numbers/Email Addresses
5. Issue reports as requested by client. Available mediums include:
 - Fax
 - Regular Mail
 - Email
 - Project Portal
 - Handwritten copy left at jobsite after completion of testing.
 - Verbal

Alfonso A. Soto, P. E., D. GE, F. ASCE, Senior Geotechnical and Construction Materials Testing Engineer/Principal will serve as the Senior Project Manager. He will be the primary technical contact for the City of San Juan, and will be responsible for resolving quality of service issues and will provide overall direction, management and oversight of all Terracon services for this project.

Mr. Soto's early project activities will include a review of the project plans and specifications to obtain an understanding of the proposed construction, as well as coordination with the City of San Juan concerning project processes including project authorities, scope of services, schedule, budget and communication processes. During this phase, Mr. Soto will also attend preconstruction meetings with the Design Team and Contractors to meet project personnel, gather additional information about the project and to answer any questions concerning project conditions and project testing and inspection procedures.

At the start of construction, qualified Project Technicians will be assigned to the project to support the field testing and inspection phase of the project. We anticipate using the services of technicians who have the appropriate certifications as outlined in the City of San Juan Scope of Services.

While on site during construction, the Technicians will be available to communicate directly with the City of San Juan Representative, and will communicate frequently with Mr. Soto concerning the status of the project and testing results via the company-owned smart phones and laptops. Mr. Soto will be responsible for keeping the City of San Juan's Representative apprised of the current status of the testing and inspection associated with the project and, as part of our quality assurance process, and he will be responsible for obtaining the appropriate level of internal review of the testing reports and documentation developed in the field.

Chuck A. Gregory, P.E., Senior Principal/Vice President/Regional Manager of Terracon, will be an In-House Consultant to the project. His duties will involve technical and administrative input including proposal review and contract negotiations. He will provide assistance and direction on technical design issues that may arise. Mr. Gregory may also provide final technical review, to include signing and sealing of technical documents. *Mr. Gregory will be available during the duration of the project.* His chargeable time to the project will not exceed about 2 percent of the project time.

After the project is assigned to Terracon, Mr. Flores will transfer any geotechnical and construction material testing projects to Mr. Soto, who in turn may have one of the following Terracon Project Managers assist him:

- Stephany Chacon, E.I.T. – Geotechnical Engineering
- Martin Reyes, E.I.T. – Geotechnical Engineering
- Juan M. Borjon, P.E. – Construction Materials Testing
- Guadalupe Leal - Construction Materials Testing

The Project Managers will supervise and coordinate the daily activities of the project for the Geotechnical Engineering and Construction Materials Engineering aspects of the project. They will engage any required subcontractors such as drillers or specialty testing requirements. They will perform technical analyses, technical review and project management. *These individuals will be available during the duration of each project.* Their chargeable time to each project will vary between 20 and 40 percent of the project time depending on the scope of each assignment.

Project No. 1**Name of Project: City of Harlingen**

Public Infrastructure & CDBG Street Overlay Projects 2016-Current

Scope of Services: Terracon is currently on-rotation to provide geotechnical engineering and construction materials testing services at various City of Harlingen projects. We provide multiple entities with copies of the results of the construction materials testing in a timely manner.

**Project No. 2****Name of Project: City of Brownsville**

CBDG and CIP Street Renovation Projects (2002 to 2005) (2008 to Present)

Scope of Services: Terracon has performed a number of geotechnical engineering studies and has been retained to perform materials testing services for the various streets and alleys for the City of Brownsville. Terracon's staff drilled soil borings and performed laboratory testing on the recovered soil samples. The data collected was used to design the pavement sections for the reconstruction of asphaltic concrete roadways and installation of new water, storm drains and sewer systems. Our pavement analysis involved performing California Bearing Ratio (CBR) tests for use in the pavement analysis. The AASHTO method for pavement design was used. Our construction materials testing services have included sampling of the pavement subgrade and base materials for moisture-density relationships in the laboratory, performing in-place field density tests on the pavement subgrade and base courses, and coring the asphaltic concrete surface to check for proper thickness and density. The costs of our geotechnical (soils) and construction materials services were completed within budget.

**Project No. 3****Name of Project: City of McAllen**

Capital Improvement Projects 2017-Current; Subdivision Projects 2009-2016

Scope of Services: Terracon is currently providing geotechnical engineering and construction materials testing services at various City of McAllen projects. We provide multiple entities with copies of the results of the construction materials testing in a timely manner. We also perform geotechnical explorations, including soil borings, for the preparation of geotechnical reports complete with boring logs, laboratory results, geotechnical recommendations, and site plans for the development of construction documents for various improvements within the city.

**Project No. 4****Name of Project: City of Edinburg**Geotechnical, Construction Material Testing and Engineering, and Environmental Services
2008-Current**Scope of Services:**

Terracon has performed a number of environmental engineering studies and has been retained to perform geotechnical soils investigations and construction materials testing services for the various streets and alleys for the City of Edinburg. Terracon's staff drilled soil borings and performed laboratory testing on the recovered soil samples. The data collected was used to design the pavement sections for the reconstruction of asphaltic concrete roadways and installation of new water, storm drains and sewer systems. Our pavement analysis involved performing California Bearing Ratio (CBR) tests for use in the pavement analysis. The AASHTO method for pavement design was used. Our construction materials testing services have included sampling of the pavement subgrade and base materials for moisture-density relationships in the laboratory, performing in-place field density tests on the pavement subgrade and base courses, and coring the asphaltic concrete surface to check for proper thickness and density.

TEAM MEMBER QUALIFICATIONS AND EXPERIENCE

Submit resumes summarizing qualifications and experience of project manager, key staff and any support staff likely to be assigned to the work.

Our Pharr office is fully equipped to perform field and laboratory testing of soils, concrete and asphalt. Our engineering and technical staff are qualified and trained to perform the construction materials testing services listed in the RFQ. Terracon can deliver the items and data being requested in the RFQ scope of services. The following is a general breakdown of the Pharr office personnel.

Licensed Texas Engineer (P.E.)	2	Logger	1
Engineer-in-Training (E.I.T.)	2	Lab Manager	1
Licensed Texas Geologist (P.G.)	1	Engineering Technicians	10
Geologist	1	Administrative Manager	1
Environmental Scientist	1	Client Development Manager	1
CMT Dispatcher	1	Secretary	1
CMT Project Managers	1*	TOTAL	25

*Most of our employees are cross-trained for maximum efficiency. For example, our logger is also a CMT technician and our E.I.T. is and a Geotechnical Project Manager. *One of our CMT PMs is also a Licensed Texas Engineer-we have 2 full time CMT PMs.*

The Prime Contact for our *Team* for the entire project will be **Jorge A. Flores, P.G.** who will serve as the Client Manager for all projects. When the City of San Juan assigns a project to Terracon, Mr. Flores will be involved in contract negotiations.

Alfonso A. Soto, P. E., D. GE, F. ASCE, Senior Geotechnical and Construction Materials Testing Engineer/Principal will serve as the Senior Project Manager. He will be the primary technical contact for the City of San Juan, and will be responsible for resolving quality of service issues and will provide overall direction, management and oversight of all Terracon services for this project.

Mr. Soto has received his Diplomate, Geotechnical Engineering (D.GE) certification. This professional certification is offered through the Academy of Geo-Professionals and ensures that geotechnical engineers have specialized knowledge and skills in their field of practice. **He is also a Fellow of the American Society of Civil Engineers (ASCE).** Through civil engineering ASCE Fellows have made significant contributions and developed creative solutions that change lives around the world. It is a prestigious honor held by fewer than 4 percent of ASCE members.

JORGE A. FLORES, P.G.

OFFICE MANAGER/ENVIRONMENTAL DEPARTMENT MANAGER

PROFESSIONAL EXPERIENCE

Mr. Flores is the office manager of Terracon's Pharr, Texas office and is responsible for supervising all geotechnical engineering, construction materials testing and environmental services in the Rio Grande Valley area. He also manages administrative, marketing and personnel development activities.

Mr. Flores has over twenty (20) years of professional experience. His project management experience includes directing environmental professional and staff level individuals in conducting due diligence environmental site assessments, developing site health and safety plans, conducting asbestos surveys, initial soil and ground water investigations, bioremediation and landfarm system operation, spill response bioremediation, waste characterization, stormwater sampling, quality assurance and quality control validation, budget and project planning for clients, and risk assessments to assist clients potential risk at various types of sites.

Mr. Flores has extensive expertise in performing field activities for groundwater monitoring and sampling, preparing file logs for soil boring and installation of monitoring wells, providing field observation for UST removal projects, and sampling and characterizing unknown waste streams. In addition, he has conducted vapor monitoring during tank degassing, aquifer slug and pump tests, and environmental site assessments (ESAs) for property transactions to determine potential environmental risk and liability due to past and present conditions.

PROJECT EXPERIENCE

City of San Juan

Mr. Flores has served as client representative and office manager on all City of San Juan projects as well as all projects across the Rio Grande Valley.

Texas Commission on Environmental Quality (TCEQ) Leaking Petroleum Storage Tank (LPST) – Texas

Project manager for numerous LPST retail fuel facility sites in Texas. Conducted site investigations, including soil boring, monitoring well and sparging point installations; groundwater monitoring and sampling events; and product recovery, including regulator reporting.

TCEQ Texas Risk Reduction Program (TRRP) Investigations and Report Preparation – Texas

Project manager for numerous Formerly Used Defense Sites, including solid waste management units, Dona Ana and MacGregor missile ranges and retail dry cleaning facilities under the TRRP and Voluntary Cleanup Program. Soil boring installation included geoprobe, hollow-stem, solid-flight, air rotary and mud-rotary drilling. Groundwater monitoring and sampling included hand-bailing, vacuum enhanced recovery and low-flow techniques.

Education

Bachelor of Arts, Geology,
University of Texas, 1988

ALFONSO A. SOTO, P.E., D.GE, F.ASCE

GEOTECHNICAL AND CONSTRUCTION MATERIALS DEPARTMENT MANAGER

PROFESSIONAL EXPERIENCE

Mr. Soto is the Manager of the Geotechnical and Construction Materials Testing (CMT) services in the firm's Pharr office. He oversees the daily operations in these areas and also manages several Geotechnical and CMT projects.

Alfonso has over twenty-five (25) years of experience in geotechnical engineering, construction materials testing, project management, geotechnical design, inspection of deep and shallow foundations, and exploration for commercial, industrial, and governmental projects.

Alfonso's professional experience includes the evaluation of pile and pier foundations for lateral, compressive and tension loads; conducting roadway soil surveys for the design and improvement of new and existing roadways; performing geotechnical evaluations for residential and commercial structures to evaluate structural damage to the properties; performing geotechnical investigations to provide site preparation, pavement and foundation recommendations.

Alfonso has participated as a geotechnical engineer in several transmission lines and electrical substation projects. His expertise includes foundation design for transmission, substation, and telecommunication structures.

PROJECT EXPERIENCE

TX DOT – Rio Grande Valley Region, Texas

Provided quality control of construction materials such as asphalt, concrete, flexible base, and subgrade for various state roads and highway projects.

State Highway 365 (SH-365) – Hidalgo County, Texas

Conducted a geotechnical investigation and provided foundation design recommendations for the proposed SH 365 - Segment 1 to be located in Hidalgo County, Texas. This 7.5-mile highway includes several bridge and retaining wall structures as well as the relocation of two existing levees.

Pharr Bridge Expansion – Pharr, Texas

Conducted a geotechnical investigation and provided soil parameters including bearing capacities, scour analysis, and foundation recommendations for the expansion of the US side of the existing Pharr Bridge. Field activities included sampling near the river bank.

Wastewater Treatment Plant Expansion-Edinburg, TX

Mr. Soto was the lead geotechnical engineer and Senior CMT Project Manager during the improvements of a Wastewater Treatment Plant on M. Road and Chapin Road in Edinburg, Texas

Education

Master of Engineering, Geotechnical Engineering, Texas A&M University, 1997

Bachelor of Science, Civil Engineering, 1991

Registrations

Professional Engineer: Texas, No. 94153

Colegio de Ingenieros de Venezuela, No. 80006

Certifications

14.1.1 Soil Exploration

14.2.1 Geotech Testing

14.3.1 Transportation Foundation Studies

14.4.1 Building Foundation Studies

Affiliations

American Society of Civil Engineers (ASCE)

National Society of Professional of Professional Engineers (NSPE) Texas Section (TSPE)

Texas Transportation Institute (TTI), Staff Engineer, 1996-1997

ASV Laboratorios y Diseños de Ingenieria, s.c., Staff Engineer, 1991-1995

JUAN M. BORJON, P.E.

CONSTRUCTION MATERIALS TESTING PROJECT MANAGER

PROFESSIONAL EXPERIENCE

Juan Borjon is a Project Manager in Construction Materials Testing (CMT) services in the firm's Pharr office. As a Project Manager, Mr. Borjon helps oversee the daily operations in several CMT projects, including recording data and preparing daily reports of construction materials testing.

Juan has over five (5) years of experience in civil engineering, construction materials testing, project management, land development, and civil design. Juan has participated as a civil engineer in several water/wastewater lines projects.

His expertise includes writing engineering reports in order to obtain project funding for civil engineering projects and preparing construction cost estimates. Juan's professional experience also includes the preparation of CMT proposals, budgets, and evaluation of pavements.

PROJECT EXPERIENCE

Rabb Road Drainage Improvements

Mr. Borjon prepared a construction materials testing proposal for construction services during the on-going Rabb Road Project that includes a newly constructed road with curb and gutter and the installation of reinforced concrete pipe. The project is located along Rabb Road in La Feria, Texas.

Texas A&M University Kingsville – Campus Streets and Parking Lots – Pavement Assessment Project

Mr. Borjon performed a site investigation of the existing pavement condition of the Texas A&M University Kingsville campus. The project included writing a Pavement Assessment Report composed of site photos, recommendations to rehabilitate the pavement, associated construction cost estimates for pavement rehabilitation, and a matrix rating score of the existing pavement condition of individual campus streets and parking lots.

Sprague Road Sewer Interceptor TWDB Project – McAllen

Mr. Borjon was a project engineer that assisted in writing the preliminary engineering report to obtain project funding for the construction of a 48" Sanitary Sewer Line that extended from the McAllen North Wastewater Treatment Plant. He prepared the preliminary design of the Sprague Road Sewer Interceptor, which included pipe sizing, lengths, slopes, and wastewater sub service areas. The project's main purpose and driving force was to provide public wastewater service to several colonias in Hidalgo County, Texas.

City of La Feria 2012 TWDB Water/Wastewater Improvements

Mr. Borjon was a project engineer that assisted in writing the engineering feasibility report in order to obtain project funding from the Texas Water Development Board (TWDB). He prepared the construction cost estimates for the various water and wastewater lines.

Education

Bachelor of Science, Civil Engineering, The University of Texas at Austin, 2009

STEPHANY CHACÓN, E.I.T.

GEOTECHNICAL SPECIALIST

PROFESSIONAL EXPERIENCE

Mrs. Chacón is a Geotechnical Specialist in the firm's Pharr office. Her training includes geotechnical design, site investigation and subsurface exploration for public works, educational, commercial and residential projects.

Stephany's experience includes performing geotechnical investigations to recommend foundation systems for various types of facilities. These structures have been supported on mats, slabs-on-grade, spread footings piles, and drilled piers. These facilities generally require recommendations for site preparation including grading/leveling the site, pavements for parking and driveways, and expansive soil evaluations. Stephany has also performed the geotechnical investigations for street and drainage projects to provide soil recommendations for roadways, pavements and utility lines.

PROJECT EXPERIENCE

City of Pharr -Pharr/Reynosa Bridge Lane Expansion-Pharr, TX

Performed a geotechnical engineering study for the Pharr-Reynosa Bridge Lane Expansion. The project includes the lane expansion of the Pharr-Reynosa International Bridge.

State Highway 365 (SH-365) – Hidalgo County, Texas

Mrs. Chacón was the assistant geotechnical engineer during a geotechnical investigation and provided foundation design recommendations for the proposed SH 365 - Segment 1 to be located in Hidalgo County, Texas. This 7.5-mile highway will include several bridge and retaining wall structures as well as the relocation of two existing levees. Terracon provided minimum recommendations required to satisfy sliding, overturning, bearing capacity and global stability for the Mechanically Stabilized Earth (MSE) walls. We also conducted seepage, levee global stability and settlement analysis for the proposed levees.

City of Brownsville - Solar Canopy, Brownsville, TX

Mrs. Chacón was the assistant geotechnical engineer for the Solar Canopy in Brownsville, Texas. The project includes the construction of a canopy structure.

Martinal – FM 511 Waterline Loop, Brownsville, TX

Performed a geotechnical engineering study for the installation of pipelines along and across existing roads and canals within the limits of the City of Brownsville.

UT System -South Texas Medical Academic, Edinburg, TX

Performed a geotechnical engineering study for the construction of the new South Texas Medical Academic Building located within the grounds of The University of Texas Pan American. The project includes the construction of a three-story and a single-story academic buildings supported on deep foundations and associated pavements/parking areas.

MARTIN REYES, E.I.T. SENIOR STAFF ENGINEER

PROFESSIONAL EXPERIENCE

Martin Reyes has over 20 years of professional civil engineering experience with specialization and expertise in the technical areas of Geotechnical Engineering, Construction Materials Engineering and Testing, Pavement Design, Foundation Design, and Surveying. His experience includes the evaluation of deep foundations for lateral, compressive and tension loads; improvement of new and existing roadways, earthwork, shallow and deep foundation construction, site paving, all phases of concreting, post-tensioning, structural masonry, and structural steel operations.

Mr. Reyes has been involved in materials engineering applications for the design and evaluation of experimental test sections; operation and supervision of pilot plant operations; design and preparation of concrete mixes, asphalt testing, ready mix testing, aggregate testing, batch plant inspections, base and subgrade stabilization, sprayed-on-fireproofing evaluation, and drill pier foundation observation on major construction projects.

Martin's duties as a staff engineer and project manager have consisted of supervision/performance of geotechnical and construction observation and testing services during construction of numerous structures. Duties include, but not limited to assisting the field and laboratory technical staff in assignment of testing. Review of test results data and project coordination with the client, contractor and/or local, state and government agencies.

PROJECT EXPERIENCE

USMS Prison – Laredo, Texas

Provided geotechnical over site during subsurface exploration. Performed calculation for PVR, bearing capacity for shallow and deep foundation, building subgrade preparation and pavement design.

International Boulevard Extension – Laredo, Texas

Performed geotechnical investigation and provided pavement design recommendations in accordance to the City of Laredo standards.

Laredo Community College 2nd Campus – Laredo, Texas

Served as a project manager for a subsurface soil and groundwater investigation at a 50-acre site. The construction consisted of 7 buildings for a total of 600,000 square feet of plan area. Geotechnical investigation included drilling operation, subsurface water monitoring, performing engineering calculations with regard to bearing capacity of existing soil, reduction of soil movements at the site and provided recommendations for shallow foundation system and pavements.

Laredo Children's Museum – Laredo, Texas

Served as project engineer during the initial stage of work of the Laredo Children's Museum facility. Made recommendations for shallow foundation system and pavements.

Education

GUADALUPE LEAL **CONSTRUCTION MATERIALS TESTING PROJECT MANAGER**

PROFESSIONAL EXPERIENCE

Guadalupe Leal is a Project Manager in the CME division, with more than 22 years experience in quality control testing and inspection services for the engineering, manufacturing, and construction industry. Guadalupe is employed in Terracon's Pharr office. As a Project Manager, Guadalupe is responsible for recording data and preparing a daily report of his tests and activities. Guadalupe is also involved with overseeing and the training of our engineering technicians. Guadalupe is familiar with the standards and procedures on field and laboratory testing, inspection, and reporting published by AASHTO (Association of American State and Highway Transportation Officials), ASTM (Association of Soil and Testing Materials), and TXDOT (Texas Department of Transportation). Guadalupe performs his quality control testing and inspections on projects for the private, commercial and government sectors.

PROJECT EXPERIENCE

Roadway Improvement Various Streets – City of Harlingen, TX

Provided quality control of construction materials such as asphalt, concrete, flexible base, and subgrade for various roads in Harlingen, Texas.

TX DOT – Rio Grande Valley Region, TX

Provided quality control of construction materials such as asphalt, concrete, flexible base, and subgrade for various state roads and highway projects.

Rio Grande Levee Evaluation – Fabens and Fort Hancock, TX

Mr. Leal was the Construction Materials Testing Manager during the construction of the raising of 15.4 miles of the International Boundary and Water Commission (IBWC) Upper Rio Grande Levee.

Arroyo Colorado Levees– Hidalgo and Cameron Counties, TX

Mr. Leal was the Construction Materials Testing Manager during the construction of the raising of 10.5 miles of the International Boundary and Water Commission (IBWC) Arroyo Colorado North Levee in Hidalgo and Cameron Counties, Texas.

City of McAllen-City of McAllen, TX

Project manager on all construction materials testing for the City of McAllen including, but not limited to, South Texas College West, Village Center Subdivision, Taylor Commercial Point Subdivision, Palms Tower.

Protective Fence-Upper Rio Grande Valley, Texas

Mr. Leal was the Construction Materials Testing Manager during the construction two sections of a pedestrian/aesthetic fence in various locations including near Roma point of entry, and near Rio Grande City point of entry; all of them located in the upper Rio Grande Valley, Texas. The fence consisted of a combined section of 12.51 linear miles.

Education

South Texas College, Associate of Science - Engineering 2018

Certifications

*Radiation Safety and Nuclear Gauge Training
 Texas Department of Transportation Level 1A
 Texas Department of Transportation Level 1B
 PTI Level I and II
 NICET Level 1 Soils
 NICET Level 1 Asphalt
 NICET Level 1 Concrete
 Floor Flatness – F – Number Measurement*

Work History

SouthTex Concrete; Plant Manager 1991-2003

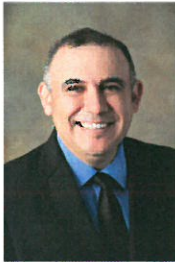

Certified Technicians

Terracon's personnel are NICET, ACI, CWI and TxDOT certified with experience on many large construction materials testing projects in South Texas. Many of Terracon's professional and technical staff serve on the boards or regularly participate in organizations developed to improve the science of engineering testing and inspection such as the American Concrete Institute, ASTM, American Association of Laboratory Accreditation, ASCE Materials Section, the Texas Council of Engineering Laboratories and the National Institute of Certified Engineering Technicians. Listed below are the certifications of the Terracon field and laboratory personnel on the City of San Juan project team.

INSURANCE

Provide information on the types and amounts of insurance carried by the PSP, including General Liability, Auto Coverage, Worker's Compensation, and Professional Liability Coverage. Include a list of any insurance claims against the firm within the past five (5) years.

Our firm maintains complete insurance coverage for commercial and professional liability. The firm's commercial, professional, automobile liability coverages are provided by Lockton Companies. Our Worker's Compensation and Automobile Insurance is provided through Liberty Mutual. A general breakdown of our coverages is as follows:

General Liability	\$2,000,000
Automobile Liability	\$1,000,000
Worker's Compensation	\$1,000,000
Umbrella Liability	\$4,000,000
Professional Liability	\$1,000,000

Commercial, Professional, Automobile and Workers Compensation Liability

Lockton Companies
444 W. 27th Street, Ste. 900
Kansas City, MO 64112-1906
(816) 960-9000

If selected as your consultant, our agents will forward the City of San Juan completed copies of our insurance certificates. For convenience, a copy of our Certificate of Liability Insurance is attached on the following page. Also see litigation statement in following section.

Our firm maintains a good relationship with Bank of America. Please feel free to contact them.

DIVIDER 5
FINANCIAL AND LEGAL STATUS

- A.) List any actions taken by any regulatory agency against or involving the firm or its agents.
- B.) List all litigation against or involving the firm or its agents or employees with respect to any work performed.
- C.) All insurance coverage that the firm has which would be applicable to the work proposed.

Terracon maintains registrations throughout the United States as a professional engineering firm. Terracon's offices within the State of Texas are overseen by the Texas Board of Professional Engineers. This gives Terracon's engineers the ability to perform engineering services and seal documents within the state of Texas. Our registration number is F3272.

Terracon is a large engineering firm specializing primarily in geotechnical, environmental, and construction materials testing and we perform tens of thousands of projects nationwide. Given the large volume of projects we perform annually, we are subject to periodic claims and litigation. The number of claims received annually is a very small percentage of the overall number of projects performed, well less than 0.5% of the total.

As a large firm performing many projects, on very rare occasions we have terminated services on our projects prior to project completion. These situations usually arise from a failure to pay for those services, or from decisions to reduce our scope of service to the point where we are no longer comfortable, from a professional perspective, with the continuation of our services on a project. Again, we would stress that we perform several thousand projects annually and these situations arise very rarely and only after thorough efforts to reasonably resolve these issues.

Terracon carries a robust program of insurance to protect us and our clients when applicable against claims arising out of our services. The majority of our reported claims are not ultimately pursued against Terracon. In the claims that are pursued, Terracon has been very successful in defending itself against claims and in many of these cases, has been able to be completely vindicated. None of our claims have in the past impacted or are estimated in the future to impact either the financial strength of our company or the ability to provide quality services to our clients.

Due to the confidentiality and sensitivity of claim information, Terracon does not provide specific information on individual claims or litigation. If you have any specific questions or concerns about this disclosure, feel free to contact us to discuss further.

All insurance coverage in which Terracon has will be applicable to the work proposed.

**DIVIDER 6
PROFESSIONAL SERVICES AGREEMENT**

Provide a statement that the Professional Services Agreement has been read, that the firm will meet the prerequisite insurance requirements, and that the firm, if selected, agrees to enter into such an agreement.

Terracon is in agreement with the terms as stated in the RFQ and can work under the previously agreed contract.

Responsive.
Resourceful | Reliable

Your business objectives are our top priority. We deliver work on time so you avoid delays, surprises, and costly mistakes. For projects large or small, single or multi-site, you can rely on consistent results.

Terracon

terracon.com/pharr

Environmental ■ Facilities ■ Geotechnical ■ Materials

Terracon complies with established national and industry standards and maintains an in-house quality assurance program to make certain that the firm provides quality services and accurate testing. Our laboratory meets the requirements of the American Society for Testing and Materials (ASTM) E 329 Standard. Test equipment is calibrated by independent certifying agencies. Terracon is regularly inspected by the National Institute of Standards and Technology through the AMRL (AASHTO Materials Reference Laboratory) and CCRL (Cement and Concrete Reference Laboratory) accreditation programs. The U.S. Army Corps of Engineers periodically visits our laboratory to inspect our testing equipment and review our testing procedures. Our Pharr office is fully equipped to perform field and laboratory testing of soils, concrete and asphalt- the **Terracon Pharr Laboratory is accredited by AASHTO Materials Reference Laboratory (AMRL) in Soils and Aggregates.**

Subject: Monthly Collection Report – May, 2018

Attached you will find the above referenced monthly tax collection report as submitted by Pablo "Paul" Villarreal Jr., County of Hidalgo, Tax Collector for the City of San Juan, Texas.

According to the property tax code, Section 10 **Reports and Remittances of Other Taxes**, "Each month the collector of taxes for a taxing unit shall prepare and submit to the governing body of the unit a written report made under oath accounting for all taxes collected for the unit during the preceding month".

The following summary is included into this memorandum for information purposes:

Tax Year	SUMMARY OF TAX LEVY COLLECTIONS				
	2017	2016	2015	2014	2013
Tax Levy	7,112,363.88	6,638,277.98	6,363,985.51	6,062,874.30	6,026,969.81
Adjustment to date	(3,285.69)	(19,259.27)	2,492.92	22,138.85	(16,498.87)
Adjusted Tax Levy	7,109,078.19	6,619,018.71	6,366,478.43	6,085,013.15	6,010,470.94
Collections to date	6,561,382.23	6,232,308.52	6,006,559.85	5,720,270.90	5,620,809.41
Percentage Collected	92.30%	94.16%	94.35%	94.01%	93.52%

A property Tax Adjustments Report (by account) for the same month and prior months is available from the Finance Department.

If you have any questions, please do not hesitate in calling me at 956-223-2232.
